ICEBREAKER

Let's Know Each Other

1

Role

Your role and the affiliate audiences you support

2

Current stack

Networks, analytics, CRM or content tools you use

3

Goal

One affiliate process you want to improve safely

© 2026 Tertiary Infotech Academy Pte Ltd

LEARNING CONTRACT

Ground Rules

1 Participate

Ask, challenge and test claims with evidence

2 Protect data

Use sample partners; never expose credentials or customer PII

3 Respect controls

Do not publish, message or spend without approval

4 Stay on time

Return promptly from breaks

5 Work hands-on

Build and verify your own lab evidence

6 Full attendance

Attend the whole day to get the most from the course

© 2026 Tertiary Infotech Academy Pte Ltd

VISUAL PORTAL FLOW

Download Course Material

1

Sign in to lms-tms.tertiaryinfotech.com

2

Open this course run

3

Download slides, Learner Guide and lab package

4

Keep materials for reference after the course

Read left to right. Each boundary has a named payload, state transition and owner.

© 2026 Tertiary Infotech Academy Pte Ltd

SCHEDULE · 7.5 HOURS

One-Day Learning Journey

1

Morning

Offer economics, market evidence and trend Skill

2

Late morning

Partner discovery, due diligence and portfolio design

3

Afternoon

Campaign factory, tracking and compliance controls

4

Late afternoon

Commission reconciliation, reporting and optimisation

© 2026 Tertiary Infotech Academy Pte Ltd

THREE ALIGNED TOPICS

Course Outline

1 Topic 1

Affiliate research, offer economics, Claude Cowork and reusable Skills

2 Topic 2

MCP-assisted partner due diligence, portfolio design and communication

3 Topic 3

Campaign tracking, compliance, commission reconciliation and reporting

© 2026 Tertiary Infotech Academy Pte Ltd

LEARNER REPOSITORY

Access the Hands-On Labs

Option A · Clone

git clone https://github.com/tertiarycourses/C1319-Agentic-AI-for-Affiliate-Marketing.git

Option B · Download ZIP

GitHub · Code · Download ZIP

https://github.com/tertiarycourses/C1319-Agentic-AI-for-Affiliate-Marketing

Each lab is self-contained. Detailed procedures and evidence checks live in the lab README and Learner Guide.

TECHNICAL CORE

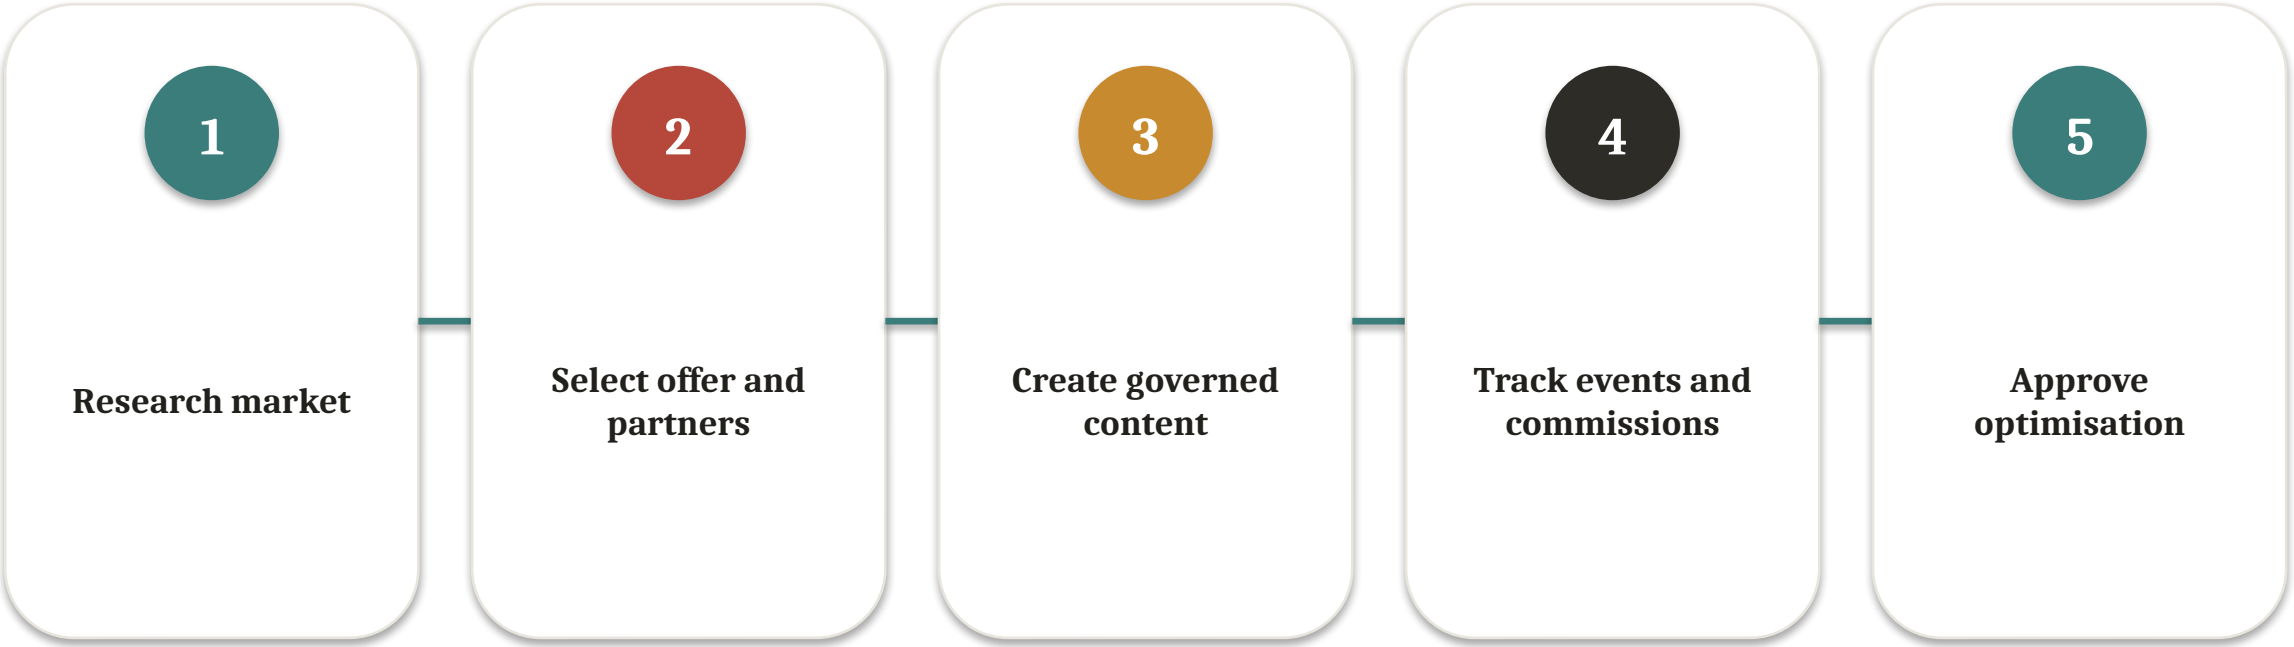

The Controlled Campaign Loop

Architecture, state, autonomy, evidence and failure controls

© 2026 Tertiary Infotech Academy Pte Ltd

RUNTIME TRACE

The Controlled Affiliate Growth Loop

Read left to right. Each boundary has a named payload, state transition and owner.

© 2026 Tertiary Infotech Academy Pte Ltd

COMPARE

Automation, Generative AI and Agents

Deterministic automation

- ✓ Fixed path and validation
- ✓ Reliable calculations and writes
- ✓ Best for identifiers and money

Agentic layer

- ✓ Plans bounded research
- ✓ Chooses approved tools
- ✓ Must not own irreversible release

© 2026 Tertiary Infotech Academy Pte Ltd

CONCRETE CONTRACT

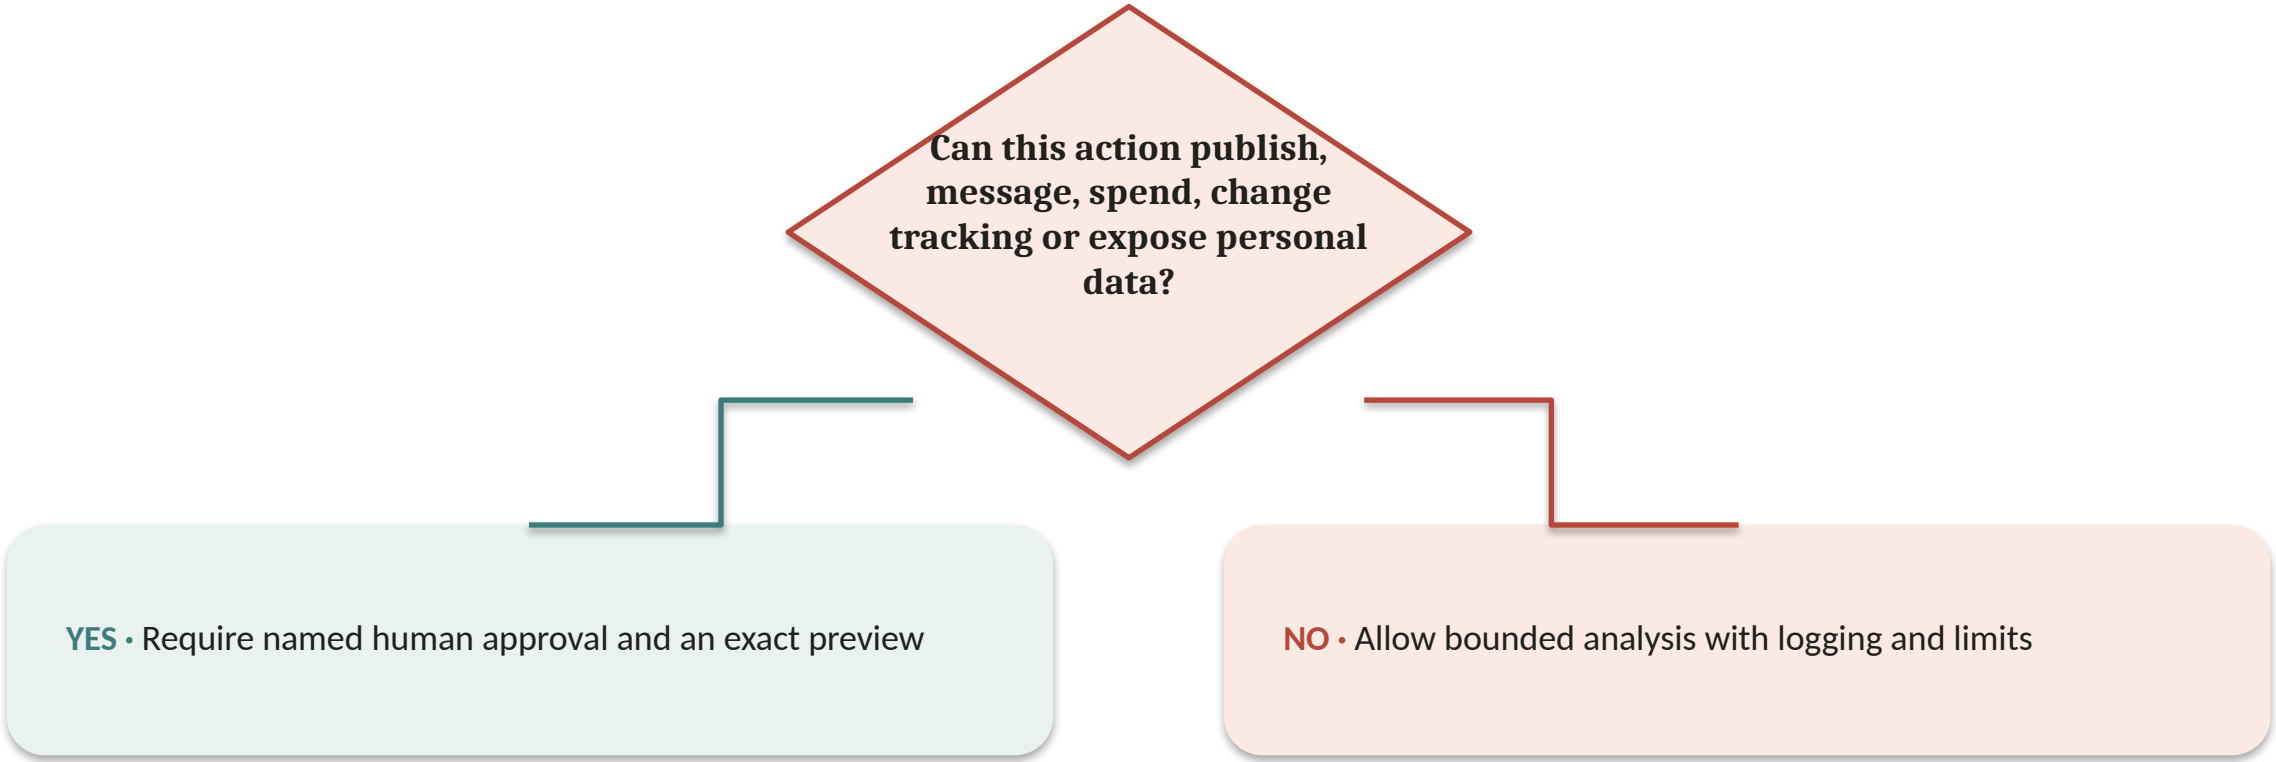

Campaign State Is a Contract

campaign_id	stable correlation key	**brief_version**	monotonic approved revision
status	draft | review | approved | live	**approval_hash**	binds decision to exact payload
source_ids	evidence behind claims	**evidence_uri**	audit artifact

© 2026 Tertiary Infotech Academy Pte Ltd

DECISION RULE

Autonomy Boundary

© 2026 Tertiary Infotech Academy Pte Ltd

WORKED CALCULATION

Affiliate Value Equation

Profit = attributed revenue - commission - media cost - platform cost - returns

REALISTIC INPUTS

$18,000 - $2,700 - $3,500 - $500 - $900 = $10,400

DECISION

Revenue alone cannot tell whether an affiliate programme creates value.

© 2026 Tertiary Infotech Academy Pte Ltd

MODEL

Five Planes of the System

1 **Strategy**

goals, audience, offer and policy

2 **Partner**

profiles, terms and communications

3 **Content**

claims, channels and tracked links

4 **Evidence**

events, metrics and commission ledger

5 **Control**

approvals, limits and audit trail

© 2026 Tertiary Infotech Academy Pte Ltd

EVIDENCE

Minimum Agent Audit Record

1 **Evidence 1**

task and run identifiers

2 **Evidence 2**

input brief version

3 **Evidence 3**

source IDs and timestamps

4 **Evidence 4**

agent output and validation

5 **Evidence 5**

human decision and payload hash

6 **Evidence 6**

external response or report artifact

© 2026 Tertiary Infotech Academy Pte Ltd

FAILURE CONTROL

Failure Taxonomy Before the Build

Evidence	unsupported or stale source
Partner	fraud, mismatch or concentration
Content	claim, disclosure or brand failure
Attribution	duplicate, missing or misassigned event
Operations	credential leak or unapproved action

© 2026 Tertiary Infotech Academy Pte Ltd

01

TOPIC 01

Affiliate Research and Campaign Planning with Claude Cowork

Market signals -> offer economics -> reusable research Skill -> evidence-led partner update

© 2026 Tertiary Infotech Academy Pte Ltd

LO1

Topic 01 Coverage

1

Mechanism 1

Model incentive economics with EPC, conversion, commission and break-even thresholds.

2

Mechanism 2

Separate observed market evidence from agent inference and partner-facing recommendations.

3

Mechanism 3

Package repeatable affiliate research and product-update work as a bounded Claude Skill.

4

Mechanism 4

Use human review to control claims, pricing, disclosure, data use and external communication.

© 2026 Tertiary Infotech Academy Pte Ltd

VISUAL MODEL

Source Allow-List

domain	approved source owner
source_type	product, policy, market or partner
freshness_days	maximum acceptable age
claims_allowed	supported statement classes
pii_rule	data-handling boundary
review_owner	human source steward

© 2026 Tertiary Infotech Academy Pte Ltd

WORKED CALCULATION

Earnings per Click

EPC = affiliate commission / unique tracked clicks

REALISTIC INPUTS

$1,260 commission / 4,200 clicks = $0.30 EPC

DECISION

Compare offers only when the attribution window and traffic quality are comparable.

© 2026 Tertiary Infotech Academy Pte Ltd

WORKED CALCULATION

Conversion Rate

Conversion rate = approved conversions / unique clicks

REALISTIC INPUTS

168 approved orders / 4,200 clicks = 4.0%

DECISION

Use approved conversions after cancellations, not raw checkout events.

© 2026 Tertiary Infotech Academy Pte Ltd

WORKED CALCULATION

Expected Commission

Expected commission = clicks x conversion rate x average order value x commission rate

REALISTIC INPUTS

5,000 x 3.2% x $140 x 12% = $2,688

DECISION

Every assumption needs a source or a sensitivity range.

© 2026 Tertiary Infotech Academy Pte Ltd

WORKED CALCULATION

Break-Even CPC

Break-even CPC = conversion rate x order value x commission rate

REALISTIC INPUTS

0.032 x $140 x 0.12 = $0.5376

DECISION

Paid traffic above $0.54 per click loses money before overhead and reversals.

© 2026 Tertiary Infotech Academy Pte Ltd

WORKED CALCULATION

Refund-Adjusted EPC

Adjusted EPC = gross commission x (1 - reversal rate) / unique clicks

REALISTIC INPUTS

$1,260 x 0.91 / 4,200 = $0.273

DECISION

A high headline commission can hide costly reversals.

© 2026 Tertiary Infotech Academy Pte Ltd

WORKED CALCULATION

Content Payback

Payback clicks = content cost / expected EPC

REALISTIC INPUTS

$900 article / $0.30 EPC = 3,000 clicks

DECISION

Use incremental qualified clicks, not page views, for payback.

© 2026 Tertiary Infotech Academy Pte Ltd

WORKED CALCULATION

Trend Priority Score

Priority = relevance x confidence x urgency / effort

REALISTIC INPUTS

4 x 3 x 4 / 2 = 24

DECISION

The score ranks research follow-up; it does not make a claim true.

© 2026 Tertiary Infotech Academy Pte Ltd

COMPARE

CPS, CPA and CPL

Revenue-linked

- ✓ CPS pays after approved sale
- ✓ Aligns with merchant revenue
- ✓ Sensitive to refunds and attribution

Action-linked

- ✓ CPA/CPL pays for defined action
- ✓ Faster feedback
- ✓ Needs strict quality validation

© 2026 Tertiary Infotech Academy Pte Ltd

COMPARE

Recurring vs One-Time Commission

Recurring

- ✓ Rewards retained subscriptions
- ✓ Requires churn and cohort view
- ✓ Longer earnings tail

One-time

- ✓ Simple settlement
- ✓ Fast payback read
- ✓ Can favour short-term acquisition

© 2026 Tertiary Infotech Academy Pte Ltd

COMPARE

Broad Category vs Narrow Niche

Broad

- ✓ Larger possible reach
- ✓ More content competition
- ✓ Weaker audience specificity

Narrow

- ✓ Clearer expertise and intent
- ✓ Smaller reachable market
- ✓ Often stronger conversion quality

© 2026 Tertiary Infotech Academy Pte Ltd

COMPARE

Review Article vs Comparison Page

Review

- ✓ Deep single-offer evidence
- ✓ Supports high-intent query
- ✓ Must disclose limitations

Comparison

- ✓ Makes criteria explicit
- ✓ Supports choice among offers
- ✓ Needs fair and current data

© 2026 Tertiary Infotech Academy Pte Ltd

COMPARE

Owned vs Paid Traffic

Owned

- ✓ SEO, email and community
- ✓ Compounds but takes time
- ✓ Greater message control

Paid

- ✓ Immediate test volume
- ✓ Marginal cost per click
- ✓ Strict break-even control

© 2026 Tertiary Infotech Academy Pte Ltd

COMPARE

Observed Signal vs Agent Inference

Observed

- ✓ Source-dated fact
- ✓ Quantified sample or change
- ✓ Reproducible by reviewer

Inferred

- ✓ Possible explanation
- ✓ Must state uncertainty
- ✓ Requires test before causality

© 2026 Tertiary Infotech Academy Pte Ltd

COMPARE

Manual Prompt vs Reusable Skill

One-off prompt

- ✓ Fast exploration
- ✓ Variable method and format
- ✓ Harder to audit

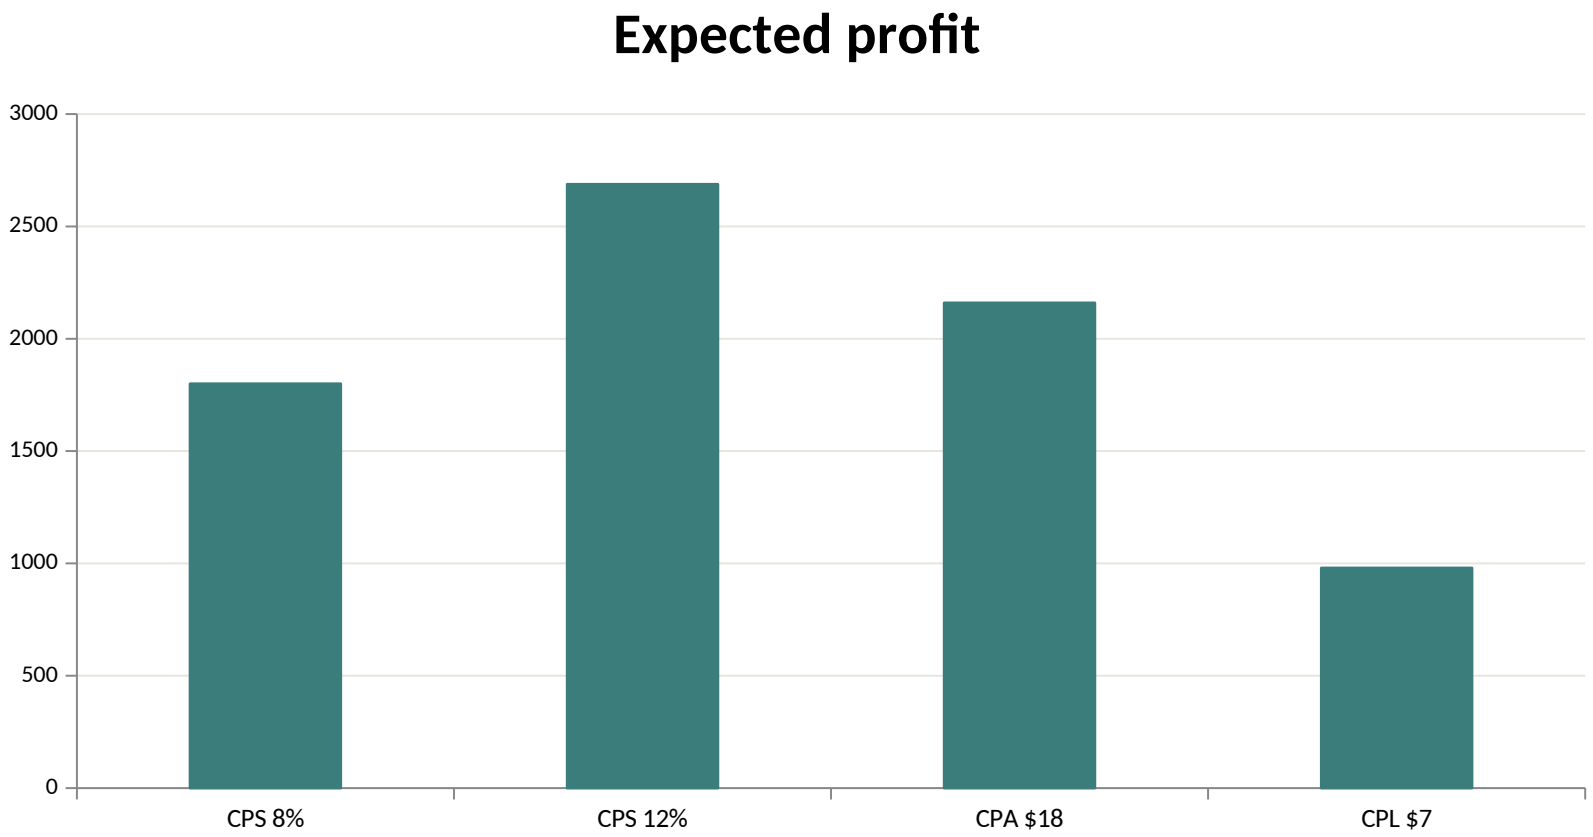

Custom Skill

- ✓ Versioned method and templates
- ✓ Repeatable acceptance checks
- ✓ Reusable across campaigns

© 2026 Tertiary Infotech Academy Pte Ltd

NATIVE PPT CHART

Commission Model Sensitivity

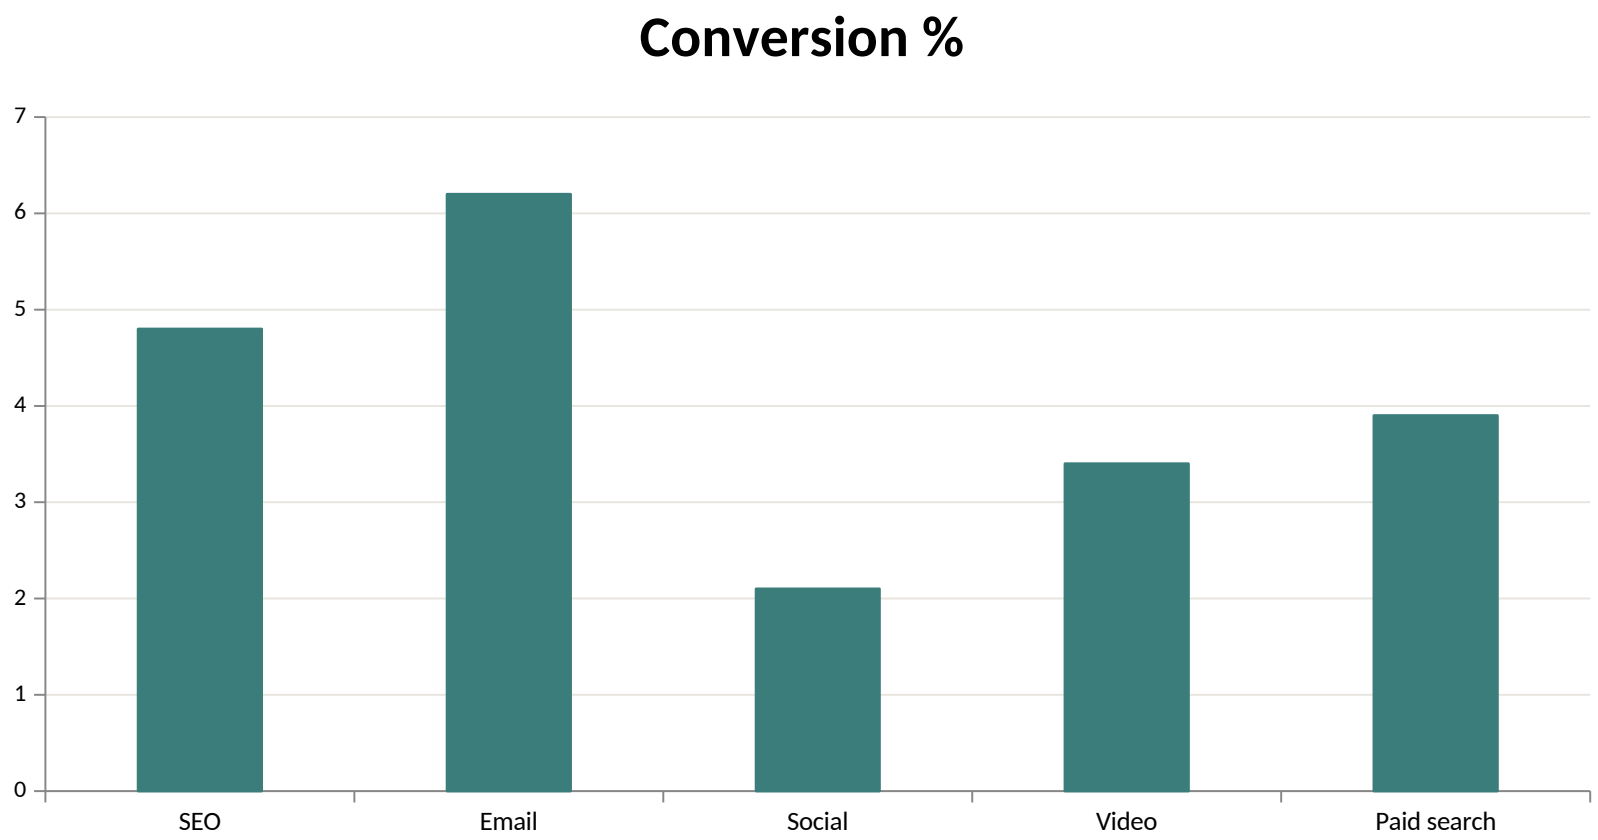

WHAT THE DATA SHOWS

The highest rate is not automatically the highest profit; conversion and validation rules dominate.

© 2026 Tertiary Infotech Academy Pte Ltd

NATIVE PPT CHART

Traffic Quality by Channel

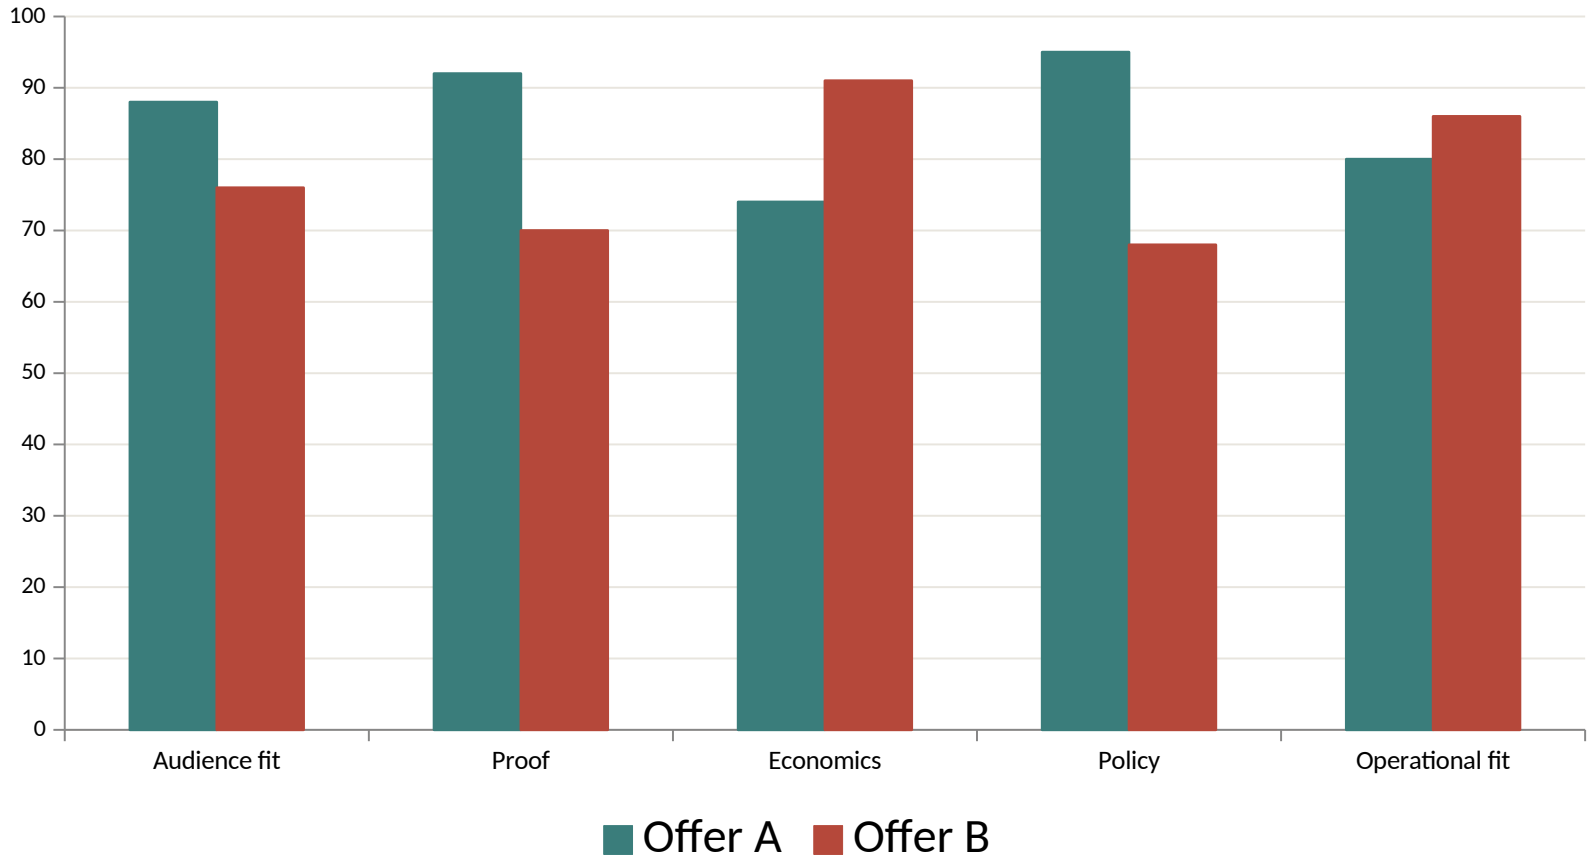

WHAT THE DATA SHOWS

Email converts best in this teaching set, while social supplies reach but weaker intent.

© 2026 Tertiary Infotech Academy Pte Ltd

NATIVE PPT CHART

Offer Scorecard

WHAT THE DATA SHOWS

Offer B's economics cannot compensate for a policy score below the release threshold.

© 2026 Tertiary Infotech Academy Pte Ltd

NATIVE PPT CHART

Trend Signal Confidence

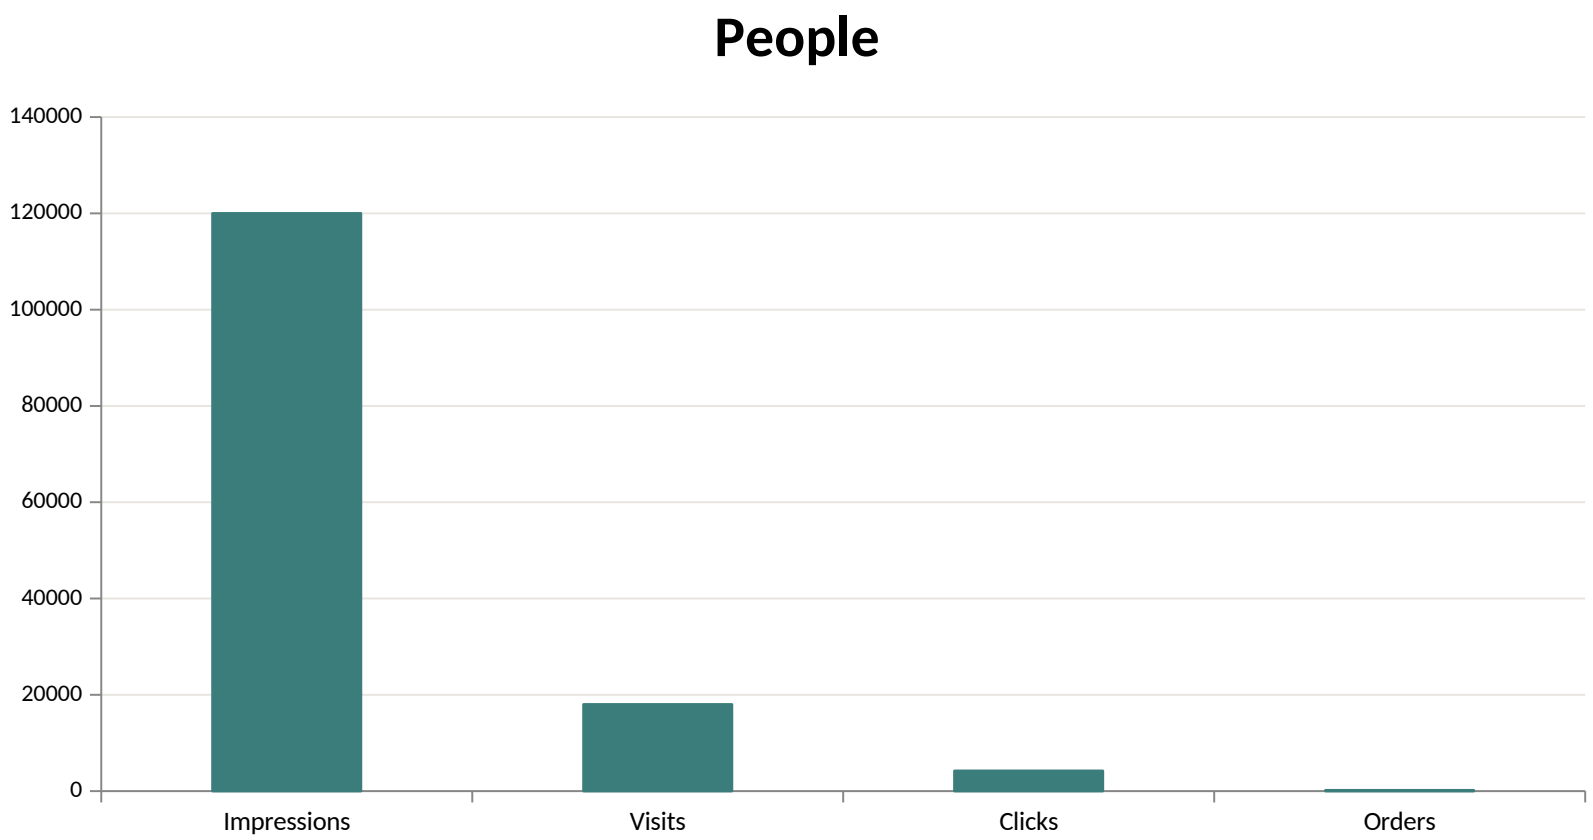

WHAT THE DATA SHOWS

Confidence rises with independent evidence and direct behavioural data.

© 2026 Tertiary Infotech Academy Pte Ltd

NATIVE PPT CHART

Content Funnel Example

WHAT THE DATA SHOWS

The largest absolute drop is visibility to visit; the commercial decision still depends on EPC and cost.

© 2026 Tertiary Infotech Academy Pte Ltd

DECISION RULE

Select an Offer

YES · Model expected value and approve a bounded pilot

NO · Reject or request missing evidence; do not average away a hard failure

© 2026 Tertiary Infotech Academy Pte Ltd

DECISION RULE

Release a Product Update

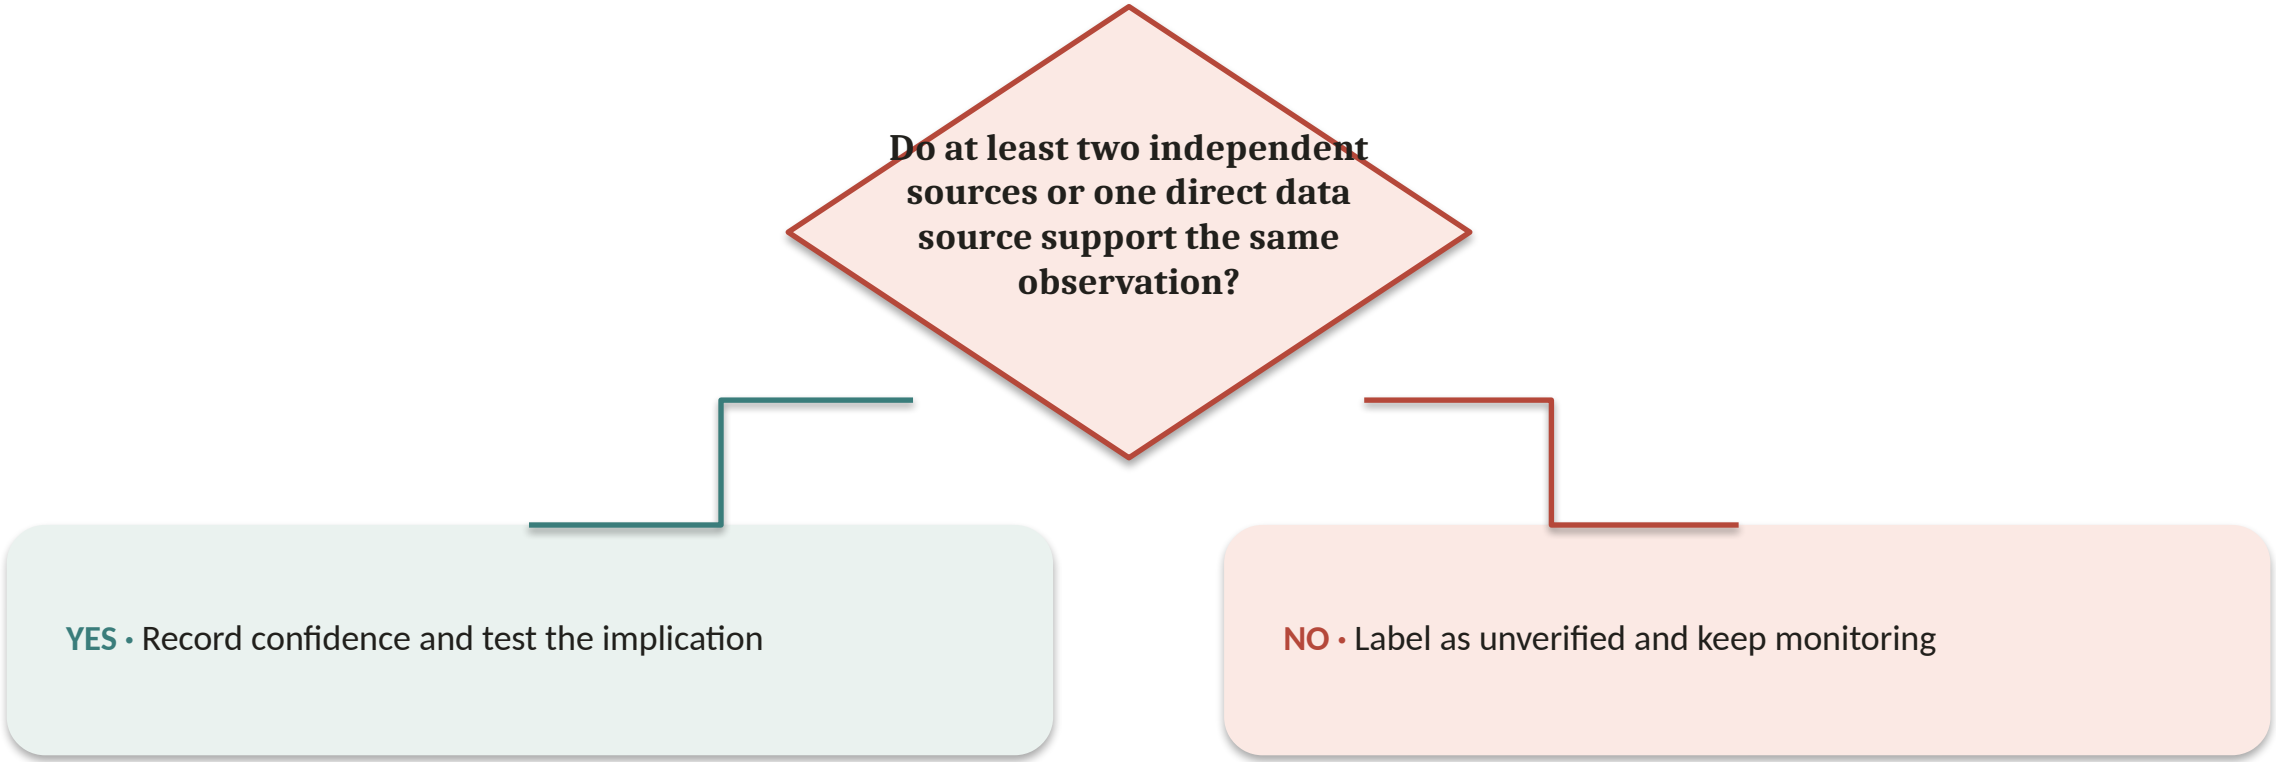

YES · Send the versioned partner update with required actions

NO · Hold the update and escalate to the product owner

© 2026 Tertiary Infotech Academy Pte Ltd

DECISION RULE

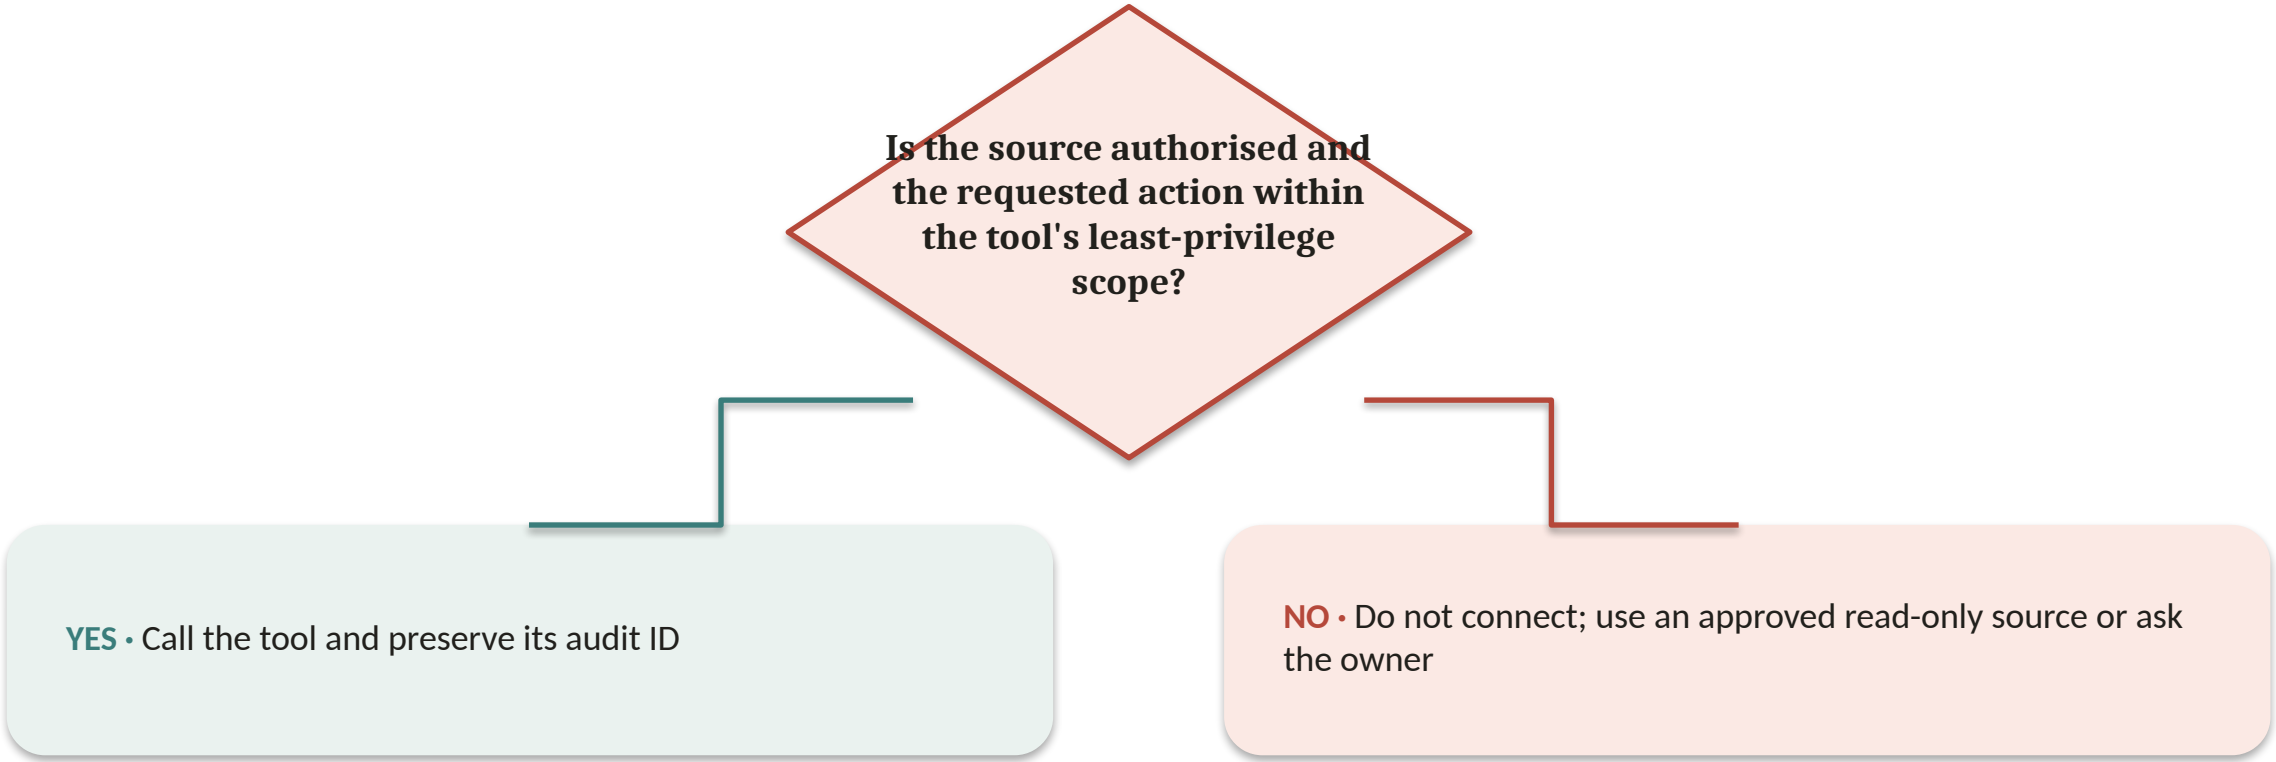

Trust a Trend Claim

© 2026 Tertiary Infotech Academy Pte Ltd

DECISION RULE

Use an MCP Tool

© 2026 Tertiary Infotech Academy Pte Ltd

FAILURE CONTROL

Offer-Selection Failure Modes

Rate bias	choosing the largest commission
Cookie mismatch	ignoring attribution window
Return exposure	using gross conversions
Weak proof	promoting unsupported benefits
Ops mismatch	merchant cannot fulfil demand

© 2026 Tertiary Infotech Academy Pte Ltd

FAILURE CONTROL

Research Failure Modes

Stale source	old trend presented as current
Source laundering	agent answer without direct URL
False consensus	many copies of one claim
Confirmation bias	search framed around desired answer
PII leakage	personal data added to prompts

© 2026 Tertiary Infotech Academy Pte Ltd

Content Failure Modes

Spam	volume without audience value
Wrong words	claims do not match intent
Wrong traffic	reach without qualified demand
Demand error	content solves no real job
Product error	offer does not fit audience

© 2026 Tertiary Infotech Academy Pte Ltd

FAILURE CONTROL

Skill and Connector Controls

Overbroad trigger	Skill runs on unrelated tasks
Hidden write	connector changes external state
Prompt injection	source text overrides workflow
Secret exposure	token appears in output
No version	method changes without review

© 2026 Tertiary Infotech Academy Pte Ltd

01

LAB 1

Affiliate Offer Economics and Niche Fit

LO1 · 25 minutes

© 2026 Tertiary Infotech Academy Pte Ltd

PRACTICE BRIDGE

Lab 1 Scenario

1 Business need

Evaluate three retail and hospitality offers using the ebook-derived product criteria, current evidence, EPC, conversion, reversal and break-even models.

2 Deliverable

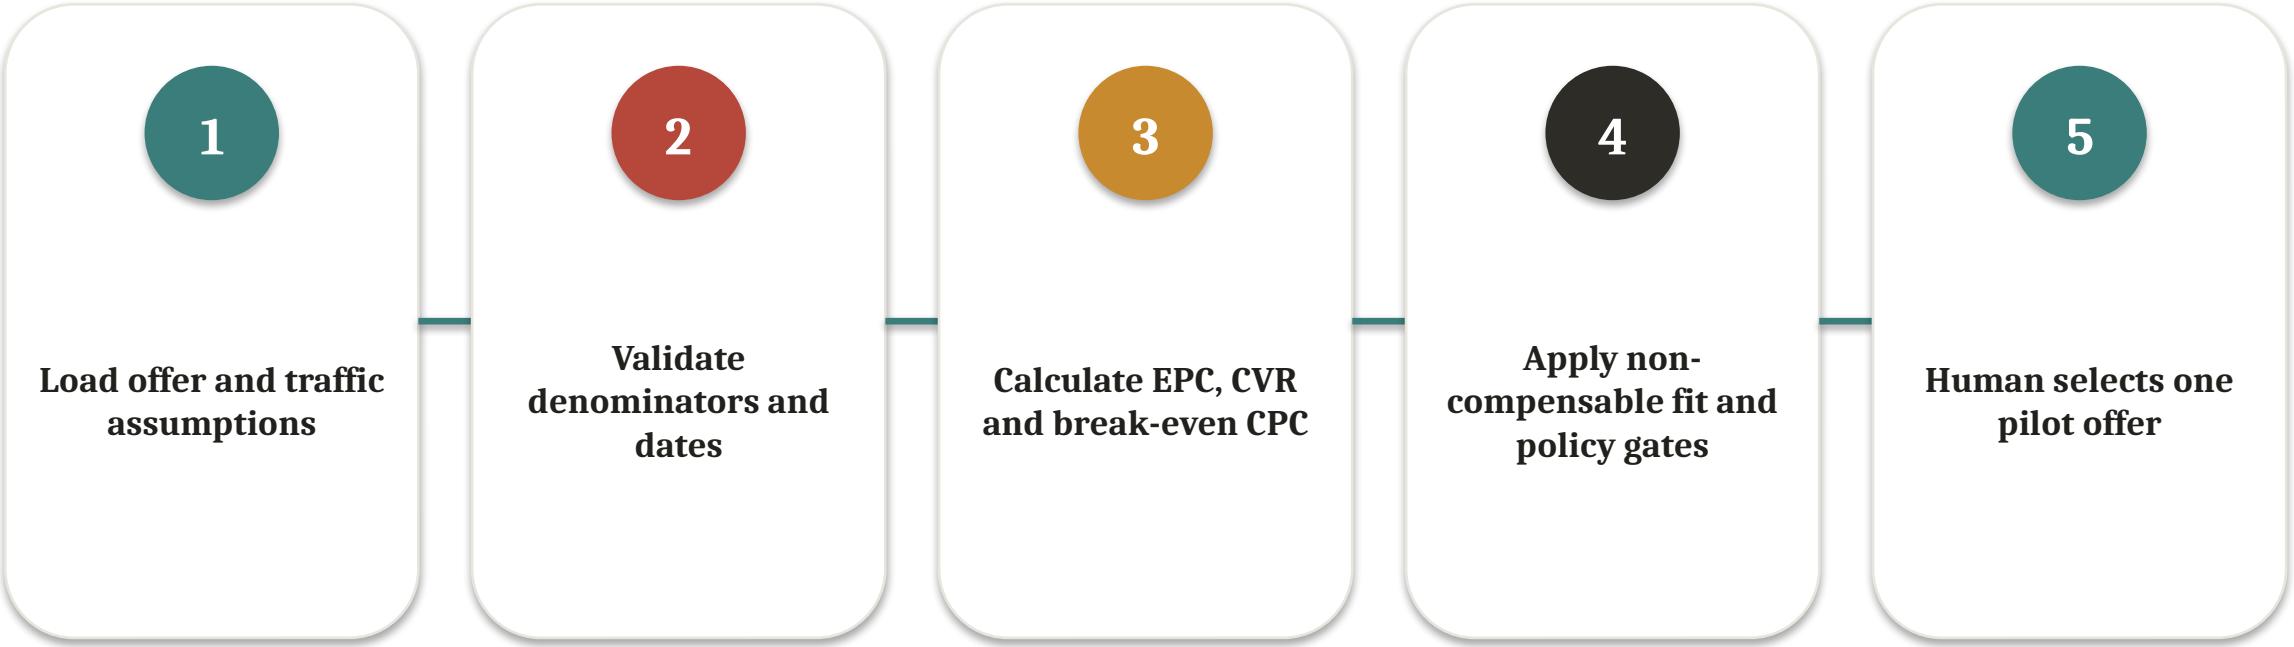

A source-backed offer scorecard and deterministic economics report.

3 Tool boundary

Claude Cowork, spreadsheet/CSV, Python calculator, supplied product evidence

© 2026 Tertiary Infotech Academy Pte Ltd

Lab 1 Runtime Mechanism

Read left to right. Each boundary has a named payload, state transition and owner.

© 2026 Tertiary Infotech Academy Pte Ltd

WHAT MUST REMAIN TRUE

Lab 1 Concrete Contract

Rule 1	unique clicks are the EPC denominator
Rule 2	approved conversions exclude reversals
Rule 3	commission terms are effective-dated
Rule 4	every qualitative score cites evidence
Rule 5	hard policy gates run before ranking

© 2026 Tertiary Infotech Academy Pte Ltd

WHAT TO CAPTURE

Lab 1 Evidence Package

1

Evidence 1

completed offer-inputs.csv

2

Evidence 2

offer-economics-report.md

3

Evidence 3

source notes

4

Evidence 4

selected offer and rationale

5

Evidence 5

one rejected offer with gate reason

© 2026 Tertiary Infotech Academy Pte Ltd

TEST WITHOUT CLICK PATHS

Lab 1 Verification and Failure

Accept

- ✓ all numeric metrics recompute
- ✓ source dates recorded
- ✓ hard gates applied before ranking
- ✓ pilot has CPC ceiling
- ✓ no unsupported claim

Diagnose

- ✓ missing denominator blocks calculation
- ✓ stale product evidence lowers confidence
- ✓ high rate cannot offset poor audience fit
- ✓ negative margin rejects paid traffic

© 2026 Tertiary Infotech Academy Pte Ltd

02

LAB 2

Trend Monitor and Product Update Skill

LO1 · 55 minutes

© 2026 Tertiary Infotech Academy Pte Ltd

PRACTICE BRIDGE

Lab 2 Scenario

1 Business need

Create a reusable Claude Skill that turns approved trend signals and product changes into evidence cards and a reviewed affiliate update.

2 Deliverable

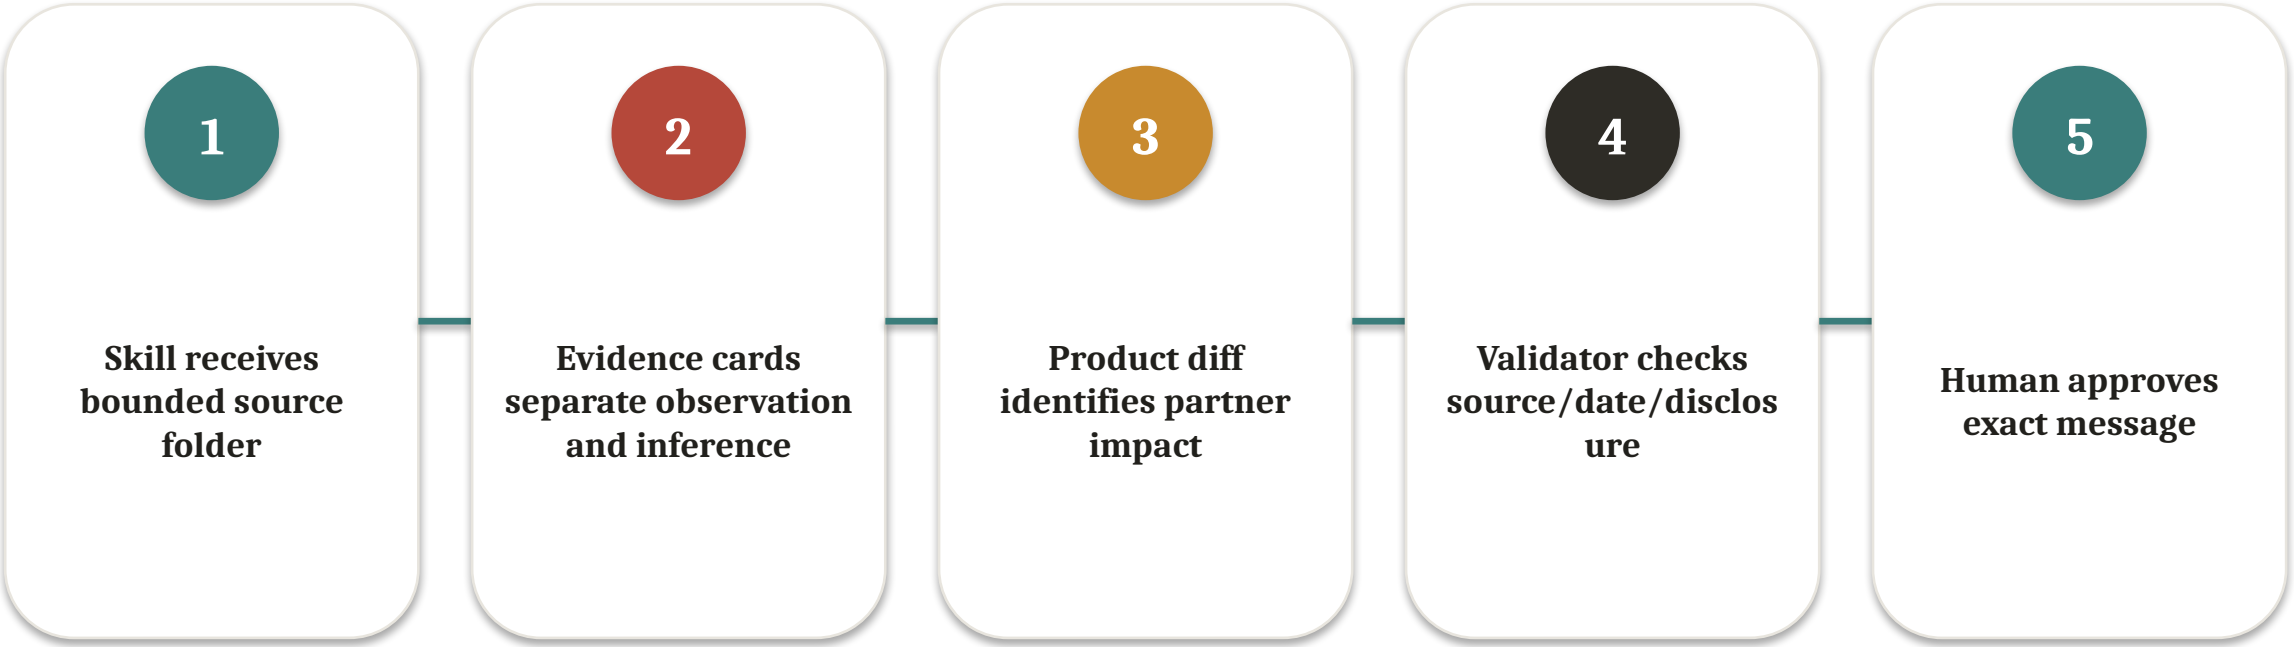

A packaged custom Skill, trend evidence set and versioned product-update brief.

3 Tool boundary

Claude Cowork, custom Skills, approved web sources, Markdown templates

© 2026 Tertiary Infotech Academy Pte Ltd

Lab 2 Runtime Mechanism

Read left to right. Each boundary has a named payload, state transition and owner.

© 2026 Tertiary Infotech Academy Pte Ltd

WHAT MUST REMAIN TRUE

Lab 2 Concrete Contract

Rule 1	Skill trigger is narrow
Rule 2	every observation has source and date
Rule 3	product facts come from approved catalogue
Rule 4	inference is labelled
Rule 5	outbound update requires human approval

© 2026 Tertiary Infotech Academy Pte Ltd

WHAT TO CAPTURE

Lab 2 Evidence Package

1

Evidence 1

skills/affiliate-trend-update/SKILL.md

2

Evidence 2

completed evidence cards

3

Evidence 3

product diff

4

Evidence 4

approved partner update

5

Evidence 5

validator result

© 2026 Tertiary Infotech Academy Pte Ltd

Lab 2 Verification and Failure

Accept

- ✓ Skill package is valid
- ✓ sources and dates present
- ✓ fact and inference separated
- ✓ product impact explicit
- ✓ human approval recorded

Diagnose

- ✓ single-source trend remains low confidence
- ✓ missing effective date blocks product update
- ✓ unsupported claim returns to research
- ✓ prompt injection text is treated as data

© 2026 Tertiary Infotech Academy Pte Ltd

02

TOPIC 02

Affiliate Portfolio and Partner Coordination with Skills and MCP

Partner discovery -> due diligence -> scoring -> portfolio balance -> coordinated communication

© 2026 Tertiary Infotech Academy Pte Ltd

LO2

Topic 02 Coverage

1

Mechanism 1

Define partner-fit evidence before allowing an agent to rank candidates.

2

Mechanism 2

Use MCP connectors as permissioned data boundaries, not invisible sources of truth.

3

Mechanism 3

Build a portfolio that balances reach, relevance, conversion quality and concentration risk.

4

Mechanism 4

Coordinate partners through versioned briefs, service levels, escalation and audit evidence.

© 2026 Tertiary Infotech Academy Pte Ltd

acknowledged_at	nullable response time
next_action	owner and due date

© 2026 Tertiary Infotech Academy Pte Ltd

WORKED CALCULATION

Weighted Partner Score

Score = sum(weight x criterion score)

REALISTIC INPUTS

0.30x88 + 0.25x76 + 0.20x92 + 0.15x80 + 0.10x70 = 82.8

DECISION

Apply hard gates before ranking; a policy failure must not be averaged away.

© 2026 Tertiary Infotech Academy Pte Ltd

WORKED CALCULATION

Engagement Rate

Engagement rate = meaningful interactions / reachable audience

REALISTIC INPUTS

1,260 interactions / 42,000 reachable followers = 3.0%

DECISION

Define meaningful interaction and use a recent sample, not lifetime vanity totals.

© 2026 Tertiary Infotech Academy Pte Ltd

WORKED CALCULATION

Portfolio Concentration

Top-3 share = revenue from top 3 partners / total affiliate revenue

REALISTIC INPUTS

$42,000 / $60,000 = 70%

DECISION

A high top-3 share increases outage and negotiation risk even when current ROI is strong.

© 2026 Tertiary Infotech Academy Pte Ltd

WORKED CALCULATION

Response SLA Attainment

SLA attainment = responses within target / support requests

REALISTIC INPUTS

87 / 100 = 87%

DECISION

Segment by partner tier; a blended result can hide failure for strategic partners.

© 2026 Tertiary Infotech Academy Pte Ltd

WORKED CALCULATION

Partner Retention

Retention = active partners at end who were active at start / active partners at start

REALISTIC INPUTS

42 / 50 = 84%

DECISION

Exclude newly recruited partners from the retention numerator and denominator.

© 2026 Tertiary Infotech Academy Pte Ltd

COMPARE

Reach vs Relevance

Reach

- ✓ Large potential audience
- ✓ Useful for awareness
- ✓ May dilute intent

Relevance

- ✓ Strong problem-offer fit
- ✓ Smaller but qualified audience
- ✓ Often better conversion quality

© 2026 Tertiary Infotech Academy Pte Ltd

COMPARE

Follower Count vs Engagement Evidence

Follower count

- ✓ Easy to collect
- ✓ May include inactive or bought accounts
- ✓ Weak behavioural proof

Engagement evidence

- ✓ Sampled denominator
- ✓ Comment and click quality
- ✓ More predictive when current

© 2026 Tertiary Infotech Academy Pte Ltd

COMPARE

Single-Star vs Portfolio Model

Single star

- ✓ Fast coordination
- ✓ High concentration risk
- ✓ One voice and channel

Portfolio

- ✓ Diversified audience and channel
- ✓ Higher operating complexity
- ✓ Needs role and capacity design

© 2026 Tertiary Infotech Academy Pte Ltd

COMPARE

Direct Outreach vs Network Recruitment

Direct

- ✓ Custom terms and relationship
- ✓ Higher research effort
- ✓ Rich strategic fit

Network

- ✓ Faster candidate access
- ✓ Standardised tracking and payout
- ✓ Less direct ownership

© 2026 Tertiary Infotech Academy Pte Ltd

COMPARE

Strategic vs Standard Partner Service

Strategic

- ✓ Joint plan and frequent review
- ✓ Custom assets and escalation
- ✓ High expected contribution

Standard

- ✓ Scalable portal and templates
- ✓ Defined response SLA
- ✓ Lower account-management cost

© 2026 Tertiary Infotech Academy Pte Ltd

COMPARE

Read-Only vs Write-Capable Connector

Read-only

- ✓ Research and retrieval
- ✓ Lower blast radius
- ✓ Default for discovery

Write-capable

- ✓ Messages or record updates
- ✓ Requires preview and approval
- ✓ Narrow fields and allow-lists

© 2026 Tertiary Infotech Academy Pte Ltd

COMPARE

Agent Recommendation vs Human Decision

Agent

- ✓ Synthesises evidence
- ✓ Applies transparent score
- ✓ Surfaces uncertainty

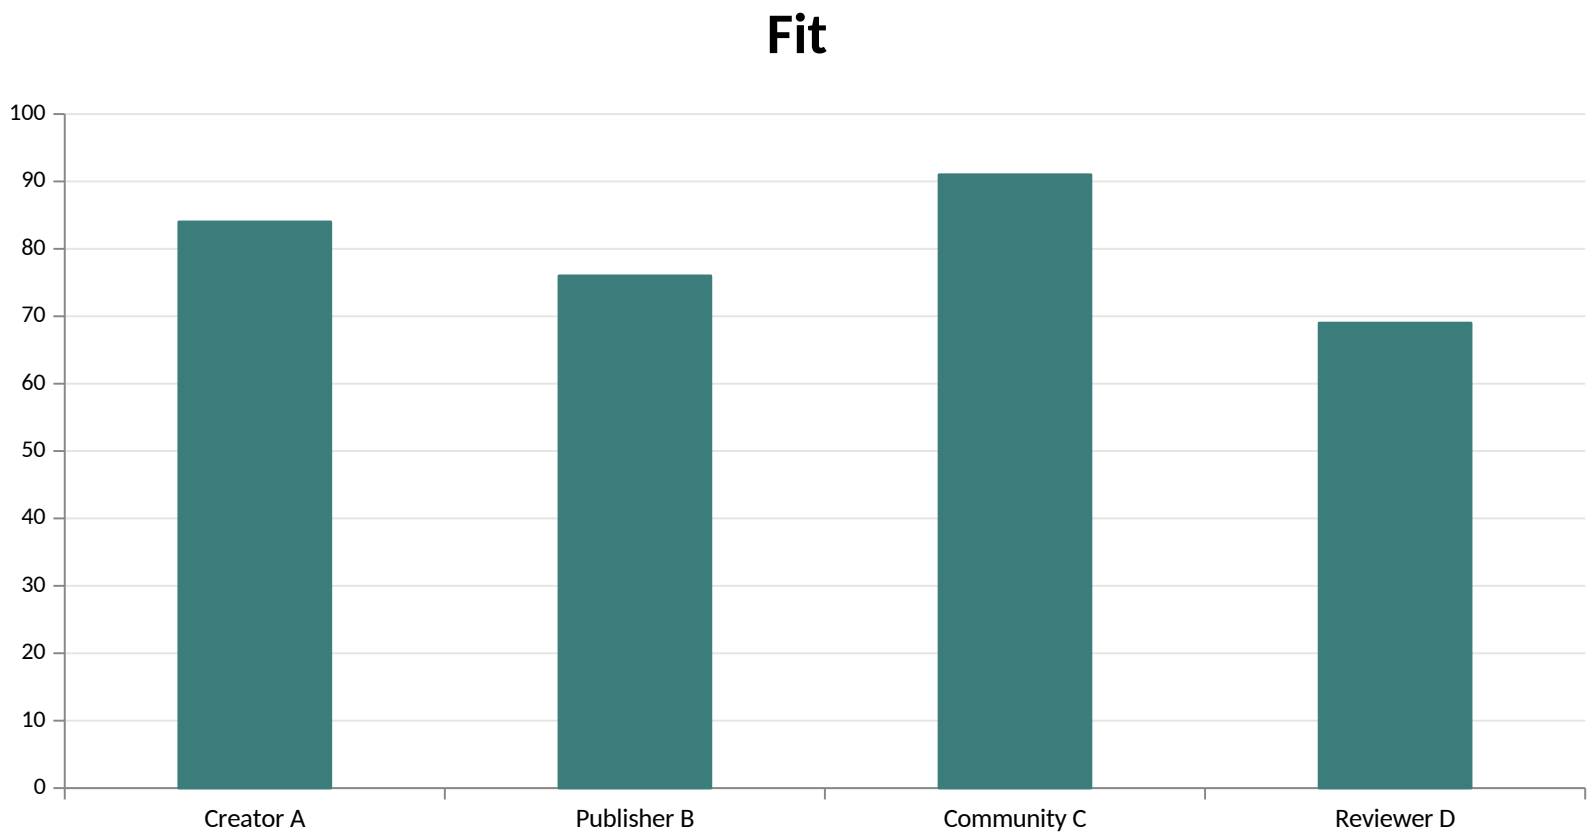

Human owner

- ✓ Judges brand and relationship context
- ✓ Accepts trade-offs
- ✓ Owns invitation and terms

© 2026 Tertiary Infotech Academy Pte Ltd

NATIVE PPT CHART

Candidate Fit Score

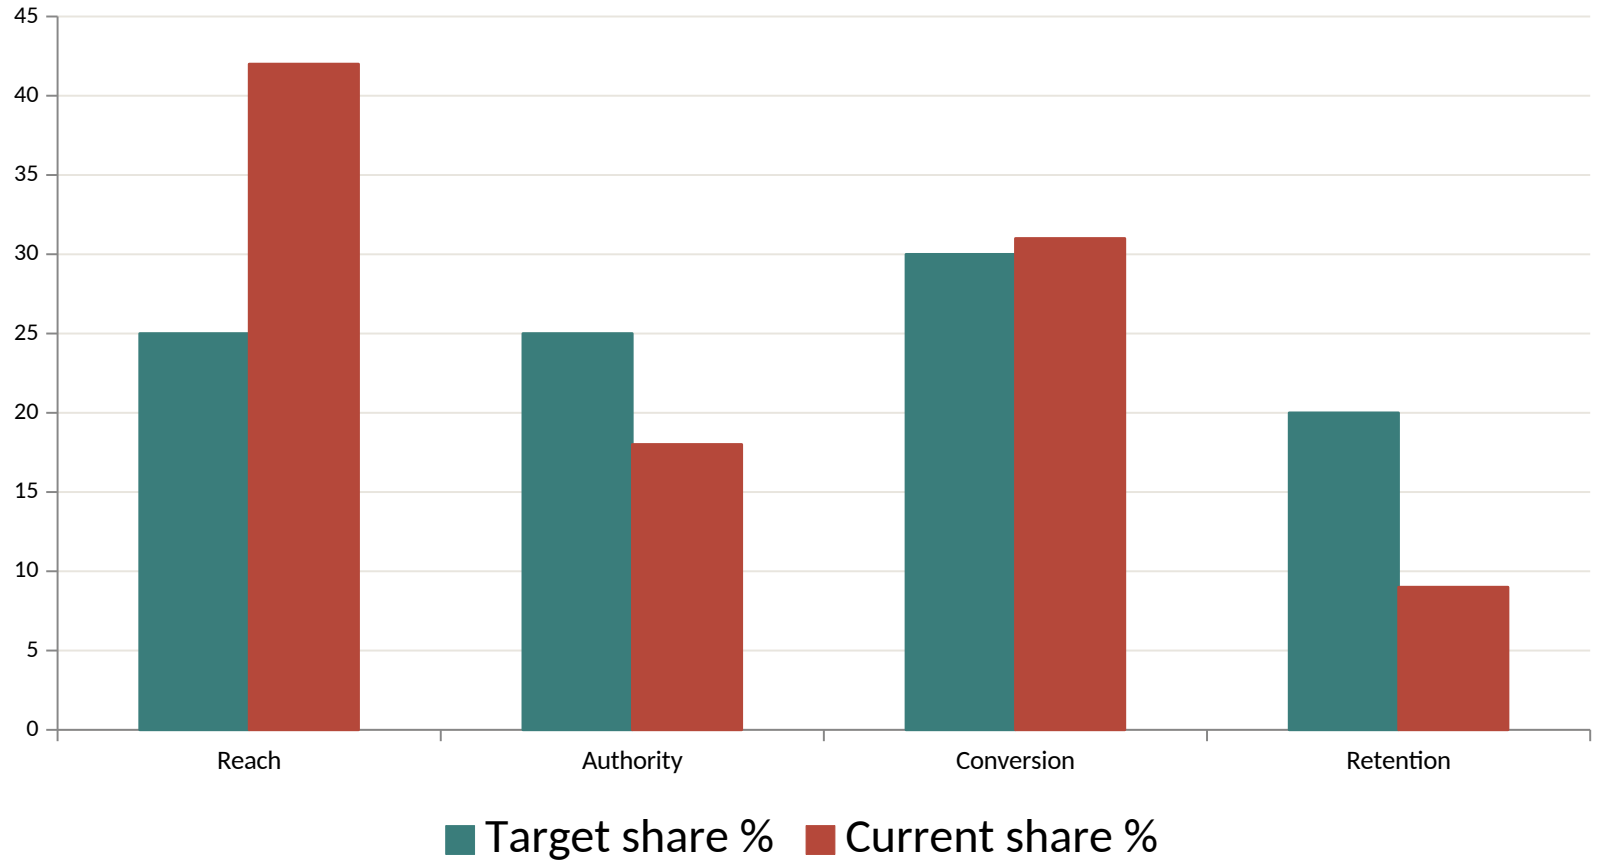

WHAT THE DATA SHOWS

Community C leads on fit; the next step is due diligence, not automatic recruitment.

© 2026 Tertiary Infotech Academy Pte Ltd

NATIVE PPT CHART

Portfolio Mix by Role

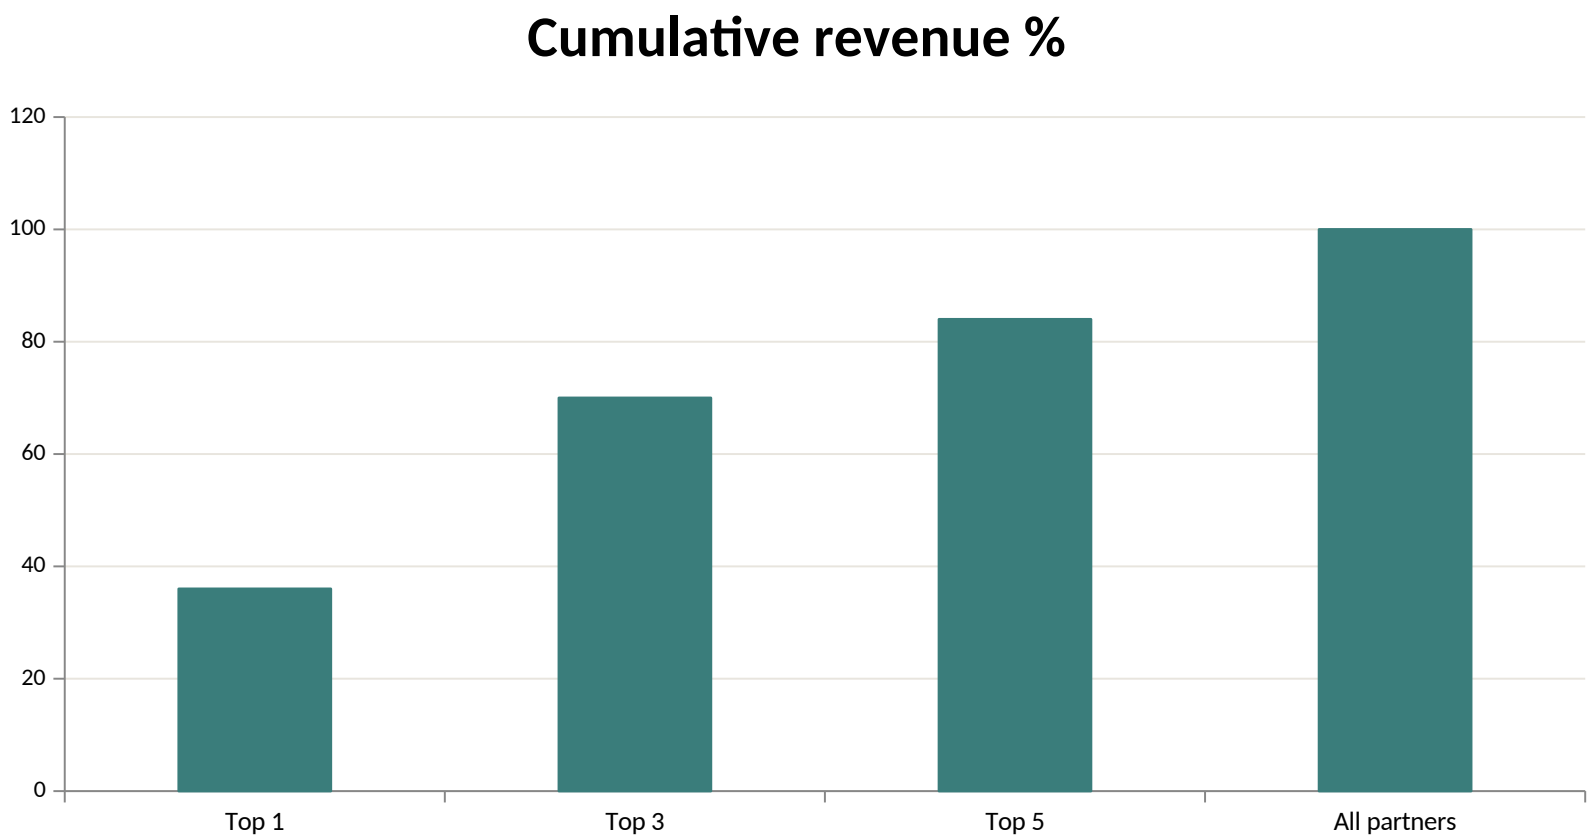

WHAT THE DATA SHOWS

The current portfolio overweights reach and underinvests in retention partners.

© 2026 Tertiary Infotech Academy Pte Ltd

NATIVE PPT CHART

Revenue Concentration

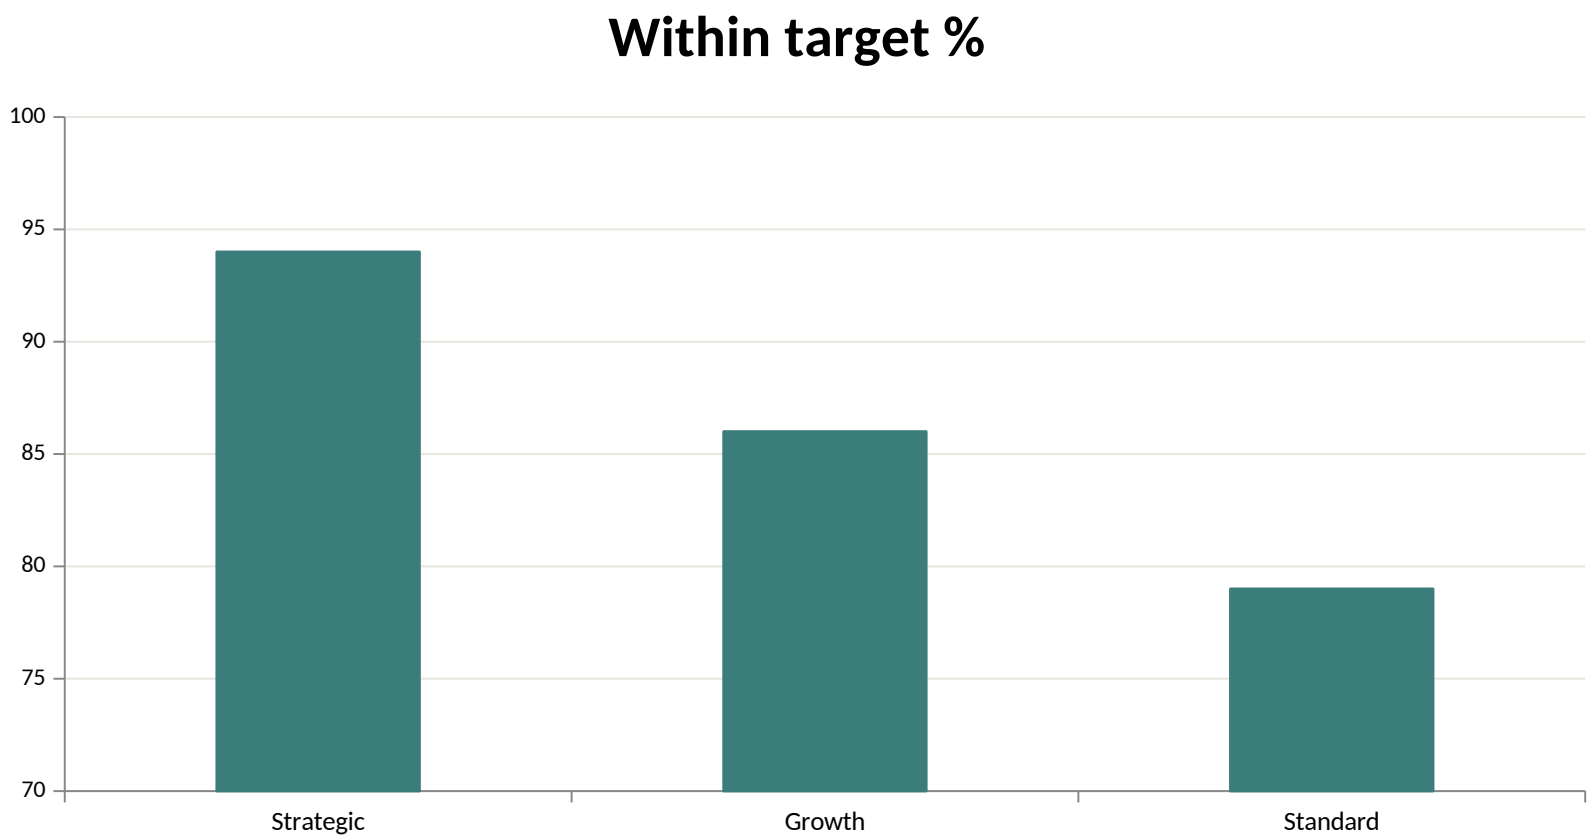

WHAT THE DATA SHOWS

Seventy percent from three partners warrants continuity planning and controlled diversification.

© 2026 Tertiary Infotech Academy Pte Ltd

NATIVE PPT CHART

Communication SLA by Tier

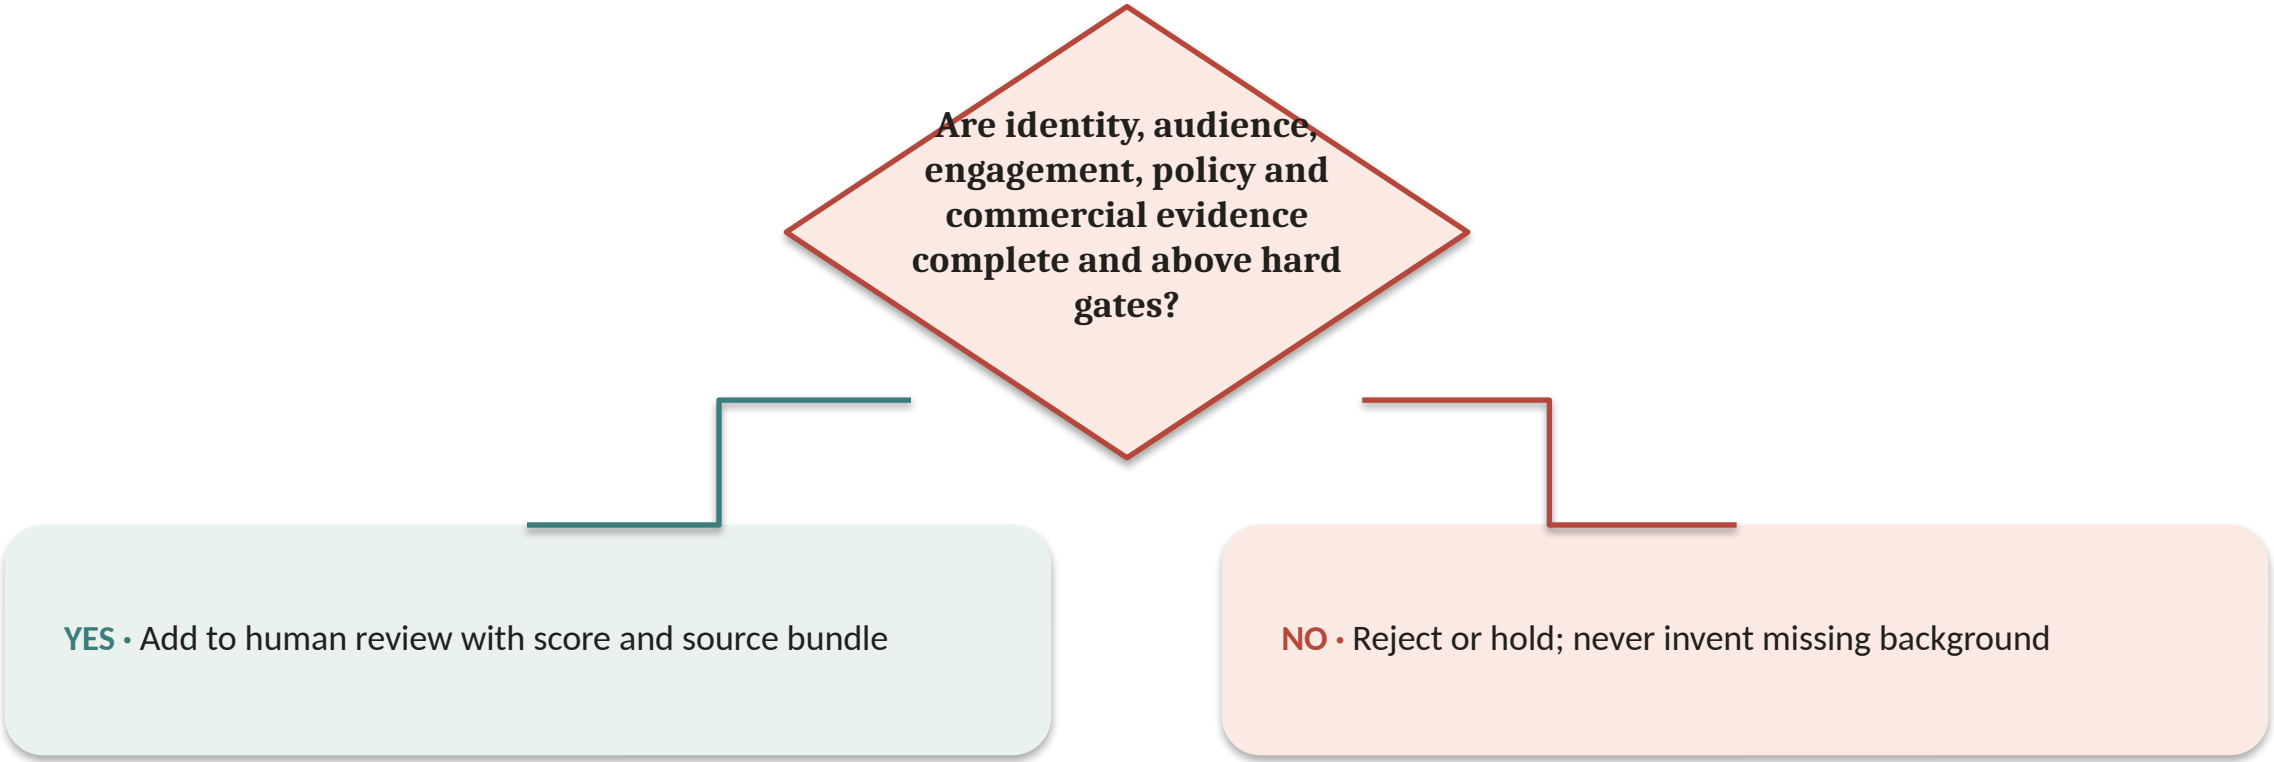

WHAT THE DATA SHOWS

The scalable standard tier needs better self-service material or routing.

© 2026 Tertiary Infotech Academy Pte Ltd

DECISION RULE

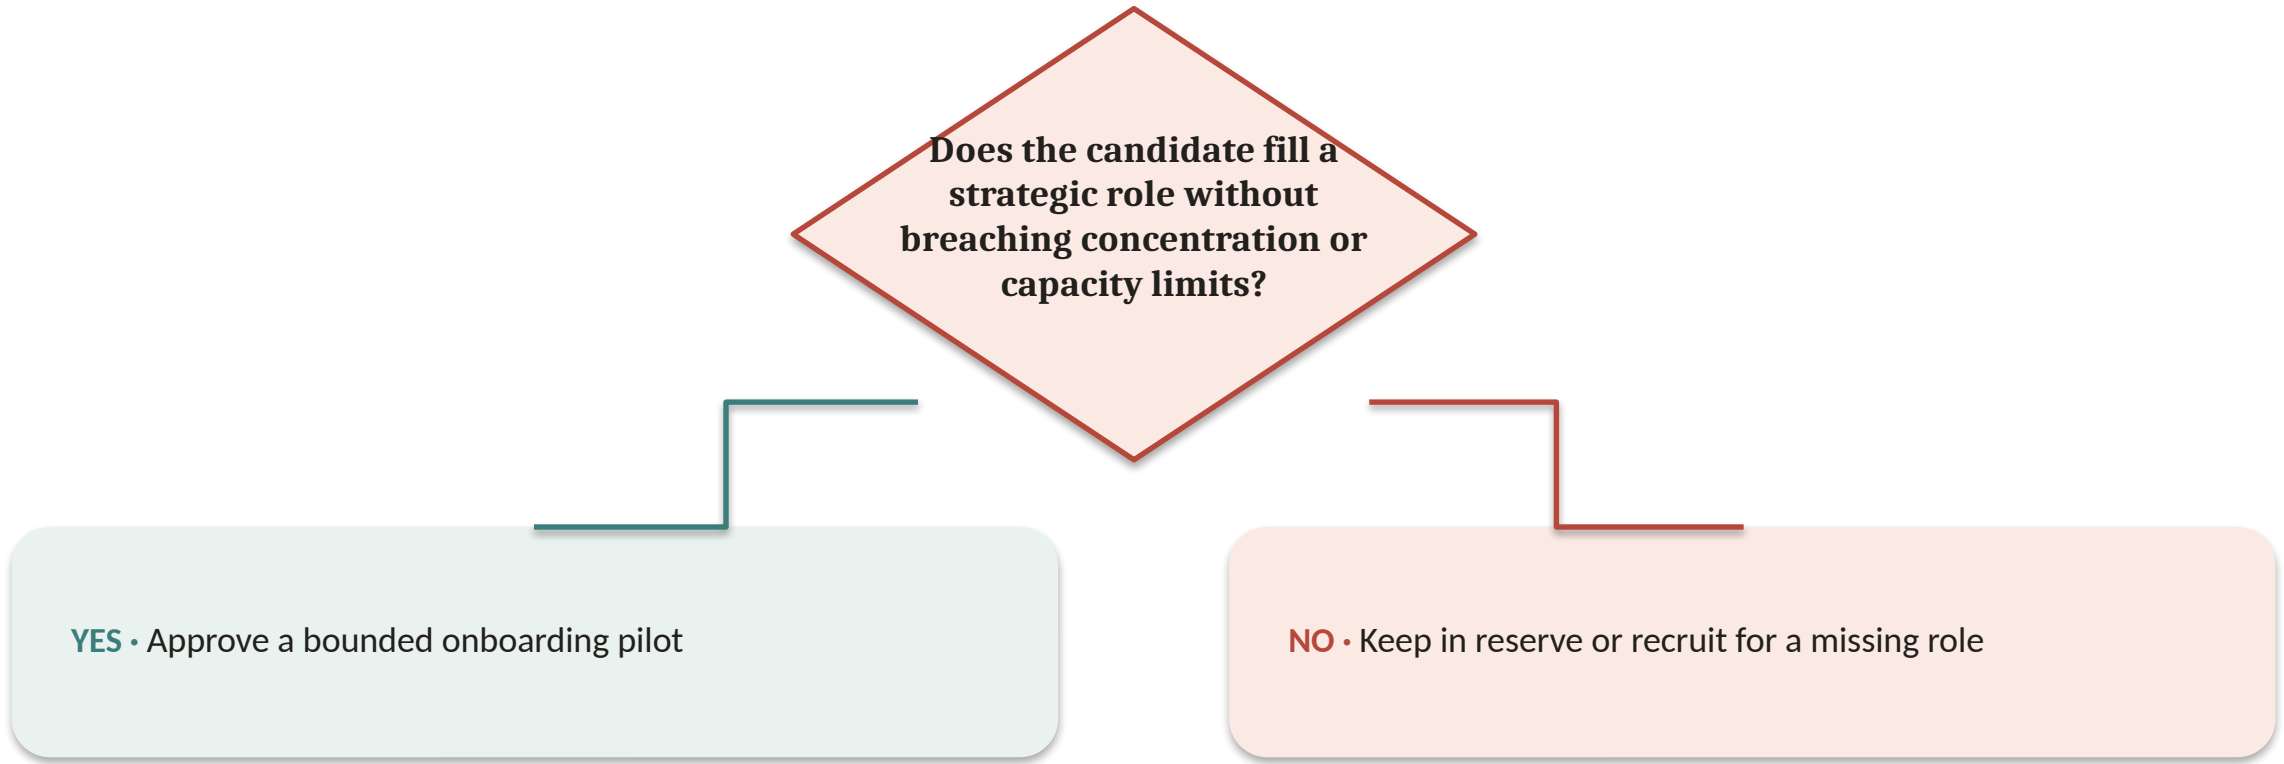

Shortlist a Candidate

© 2026 Tertiary Infotech Academy Pte Ltd

DECISION RULE

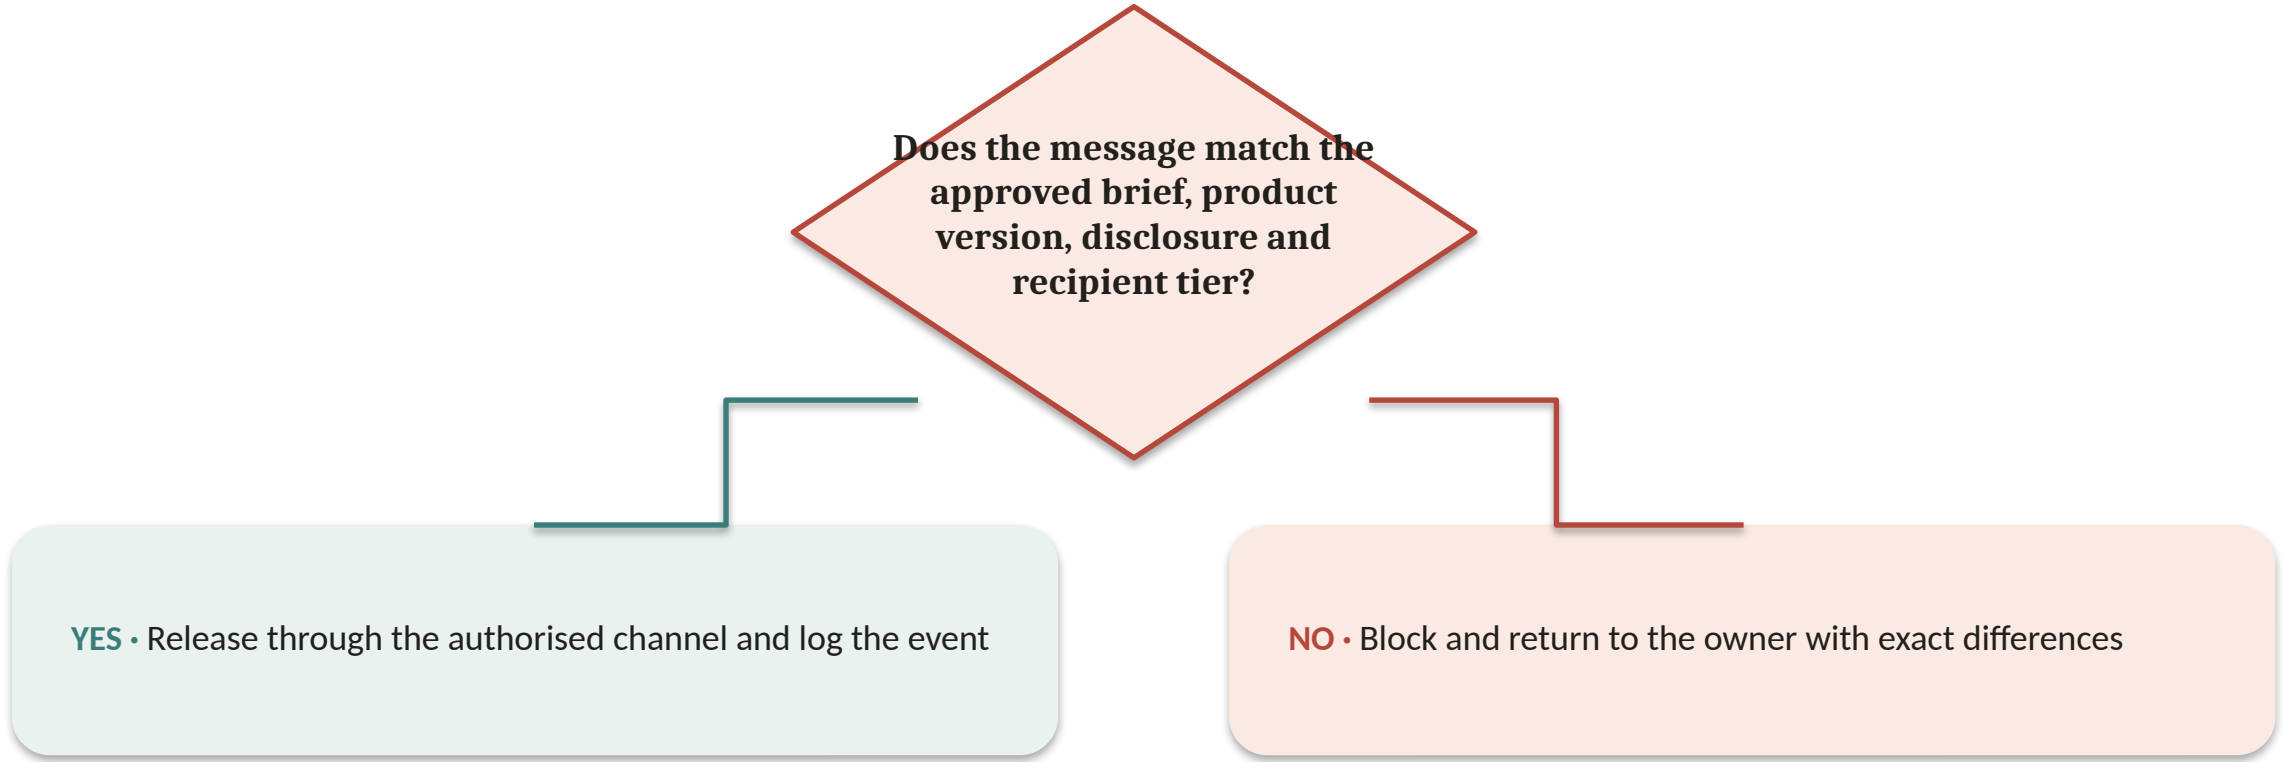

Add a Portfolio Partner

© 2026 Tertiary Infotech Academy Pte Ltd

DECISION RULE

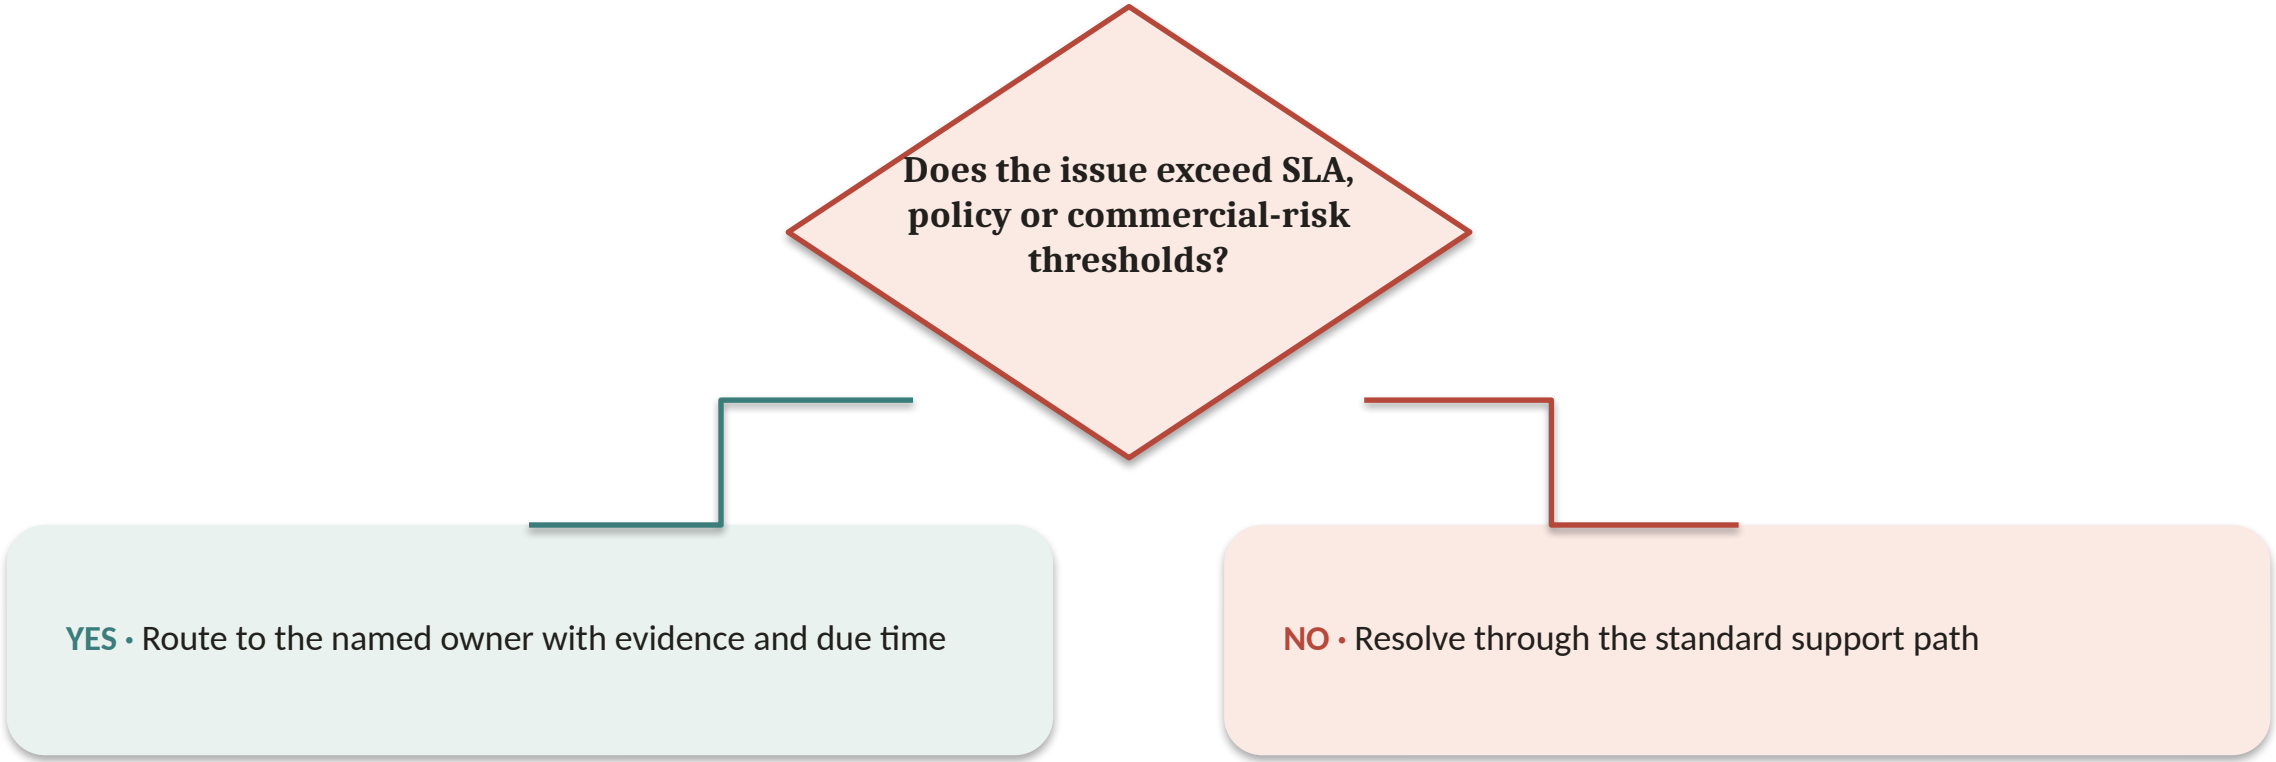

Send a Partner Message

© 2026 Tertiary Infotech Academy Pte Ltd

DECISION RULE

Escalate a Partner Issue

© 2026 Tertiary Infotech Academy Pte Ltd

Due-Diligence Failure Modes

Identity	impersonation or unverifiable ownership
Audience	mismatch, bots or stale followers
Content	unsafe claims or weak disclosure
Reputation	undisclosed conflicts or complaints
Commercial	unverified results or reference gaps

© 2026 Tertiary Infotech Academy Pte Ltd

Portfolio Failure Modes

Concentration	revenue depends on few partners
Duplication	many partners reach the same audience
Role gap	no authority or retention partner
Capacity	team cannot support recruited volume
Cannibalisation	discounting shifts existing customers

© 2026 Tertiary Infotech Academy Pte Ltd

FAILURE CONTROL

Communication Failure Modes

Version drift	old offer or assets stay live
Channel sprawl	messages cannot be audited
SLA opacity	partners do not know response time
Agent overreach	unapproved promise or term
No closure	issues lack owner and outcome

© 2026 Tertiary Infotech Academy Pte Ltd

FAILURE CONTROL

MCP and Research Controls

Excess scope	connector sees unrelated records
Prompt injection	candidate page redirects agent
Source mix-up	facts attached to wrong partner
No audit ID	retrieval cannot be reproduced
Write surprise	research tool changes external state

© 2026 Tertiary Infotech Academy Pte Ltd

LAB 3

MCP-Assisted Partner Discovery and Due Diligence

LO2 · 35 minutes

© 2026 Tertiary Infotech Academy Pte Ltd

PRACTICE BRIDGE

Lab 3 Scenario

1 Business need

Use a read-only research workflow to collect and verify candidate background information, then produce a source-backed shortlist.

2 Deliverable

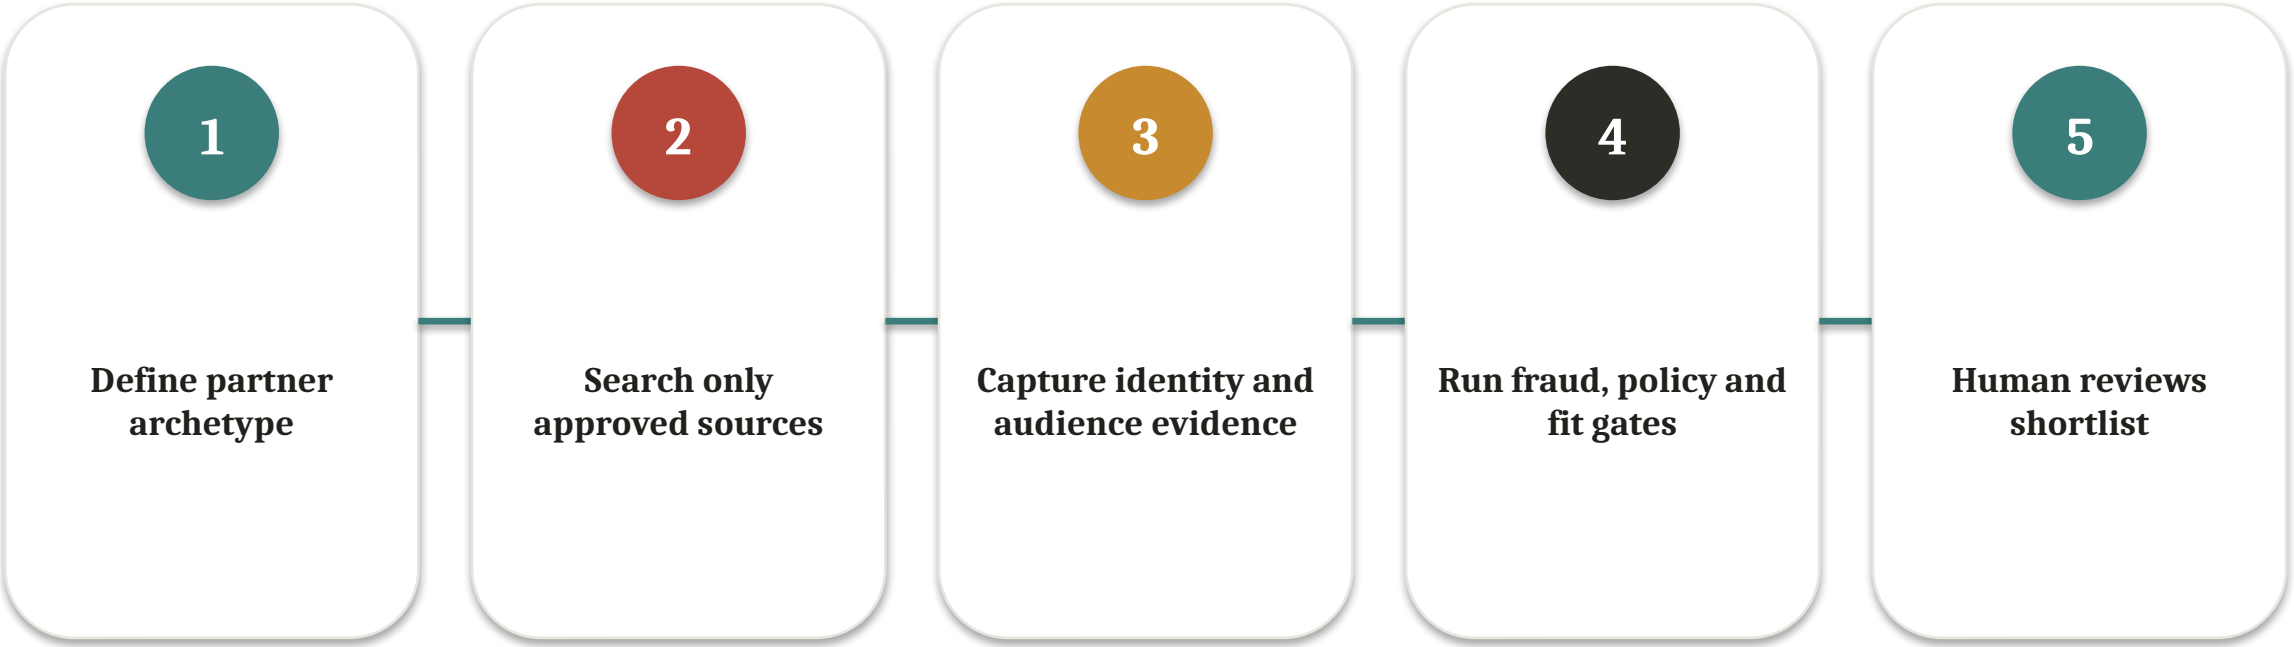

A partner evidence register, due-diligence report and explainable shortlist.

3 Tool boundary

Claude Cowork, read-only MCP/web research, CSV, Python scorecard

© 2026 Tertiary Infotech Academy Pte Ltd

Lab 3 Runtime Mechanism

Read left to right. Each boundary has a named payload, state transition and owner.

© 2026 Tertiary Infotech Academy Pte Ltd

WHAT MUST REMAIN TRUE

Lab 3 Concrete Contract

Rule 1	one row per candidate identity
Rule 2	facts retain direct source URLs
Rule 3	engagement uses a dated denominator
Rule 4	connector is read-only
Rule 5	missing evidence is never imputed

© 2026 Tertiary Infotech Academy Pte Ltd

WHAT TO CAPTURE

Lab 3 Evidence Package

1

Evidence 1

affiliate-candidates.csv

2

Evidence 2

source register

3

Evidence 3

due-diligence findings

4

Evidence 4

partner-scorecard.md

5

Evidence 5

human shortlist decision

© 2026 Tertiary Infotech Academy Pte Ltd

Lab 3 Verification and Failure

Accept

- ✓ connector boundary is read-only
- ✓ identity and audience evidence sourced
- ✓ hard gates exclude failures
- ✓ scores recompute
- ✓ human shortlist rationale recorded

Diagnose

- ✓ identity conflict blocks candidate
- ✓ bot-like engagement flags review
- ✓ source text cannot change instructions
- ✓ policy gate is non-compensable

© 2026 Tertiary Infotech Academy Pte Ltd

LAB 4

Affiliate Portfolio and Communication Agent

LO2 · 35 minutes

© 2026 Tertiary Infotech Academy Pte Ltd

PRACTICE BRIDGE

Lab 4 Scenario

1 Business need

Construct a role-balanced portfolio and a controlled communication cadence that keeps partner briefs, product updates and escalations traceable.

2 Deliverable

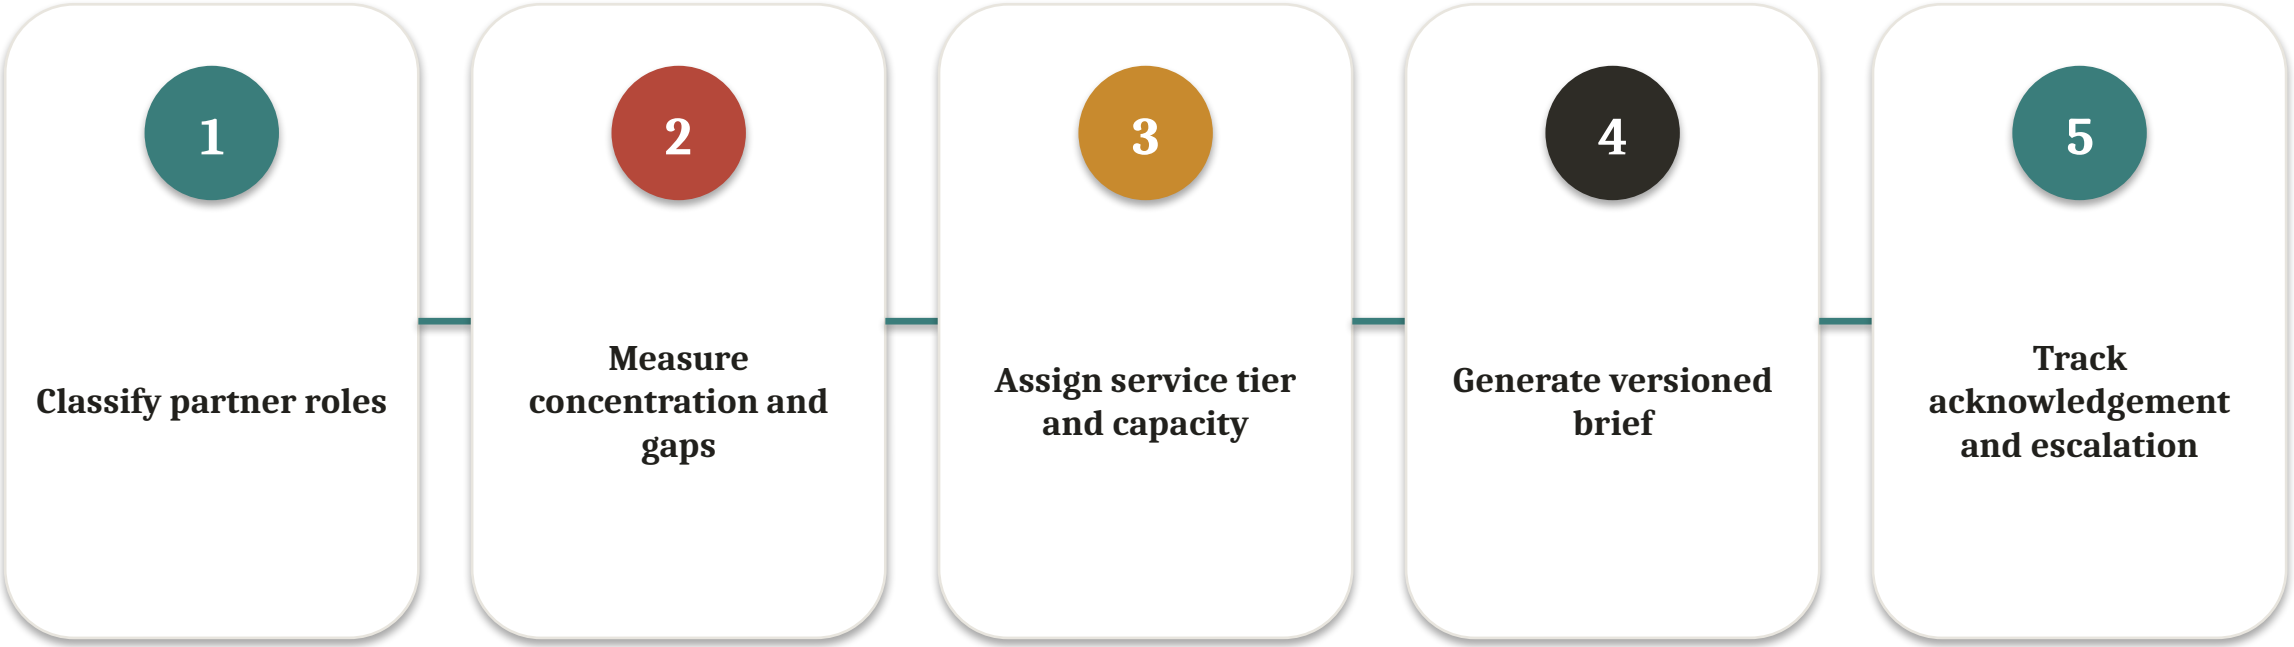

A portfolio mix model, tiered communication plan and versioned partner brief generated by a custom Skill.

3 Tool boundary

Claude Cowork, custom Skill, CSV portfolio model, Markdown brief templates

© 2026 Tertiary Infotech Academy Pte Ltd

Lab 4 Runtime Mechanism

Read left to right. Each boundary has a named payload, state transition and owner.

© 2026 Tertiary Infotech Academy Pte Ltd

WHAT MUST REMAIN TRUE

Lab 4 Concrete Contract

Rule 1	portfolio share totals 100%
Rule 2	top-3 concentration is visible
Rule 3	each partner has one owner
Rule 4	brief carries product and asset version
Rule 5	message event has outcome and next action

© 2026 Tertiary Infotech Academy Pte Ltd

WHAT TO CAPTURE

Lab 4 Evidence Package

1 Evidence 1

portfolio.csv

2 Evidence 2

portfolio-analysis.md

3 Evidence 3

communication-cadence.csv

4 Evidence 4

approved partner brief

5 Evidence 5

message and escalation log

© 2026 Tertiary Infotech Academy Pte Ltd

TEST WITHOUT CLICK PATHS

Lab 4 Verification and Failure

Accept

- ✓ portfolio shares reconcile
- ✓ concentration reported
- ✓ role gap identified
- ✓ brief versioned and approved
- ✓ SLA escalation works

Diagnose

- ✓ duplicate audience creates hidden concentration
- ✓ old brief version is blocked
- ✓ SLA miss triggers named escalation
- ✓ agent cannot change commercial terms

TOPIC 03

Campaign Reporting, Compliance and Optimisation with Agentic AI

Tracked links -> event facts -> commission reconciliation -> policy checks -> controlled experiments

© 2026 Tertiary Infotech Academy Pte Ltd

LO3

Topic 03 Coverage

1

Mechanism 1

Preserve attribution grain from click and order events through commission settlement.

2

Mechanism 2

Calculate traffic, conversion, revenue, commission and ROI with explicit denominators.

3

Mechanism 3

Gate content and partner actions with disclosure, brand, privacy and policy controls.

4

Mechanism 4

Convert dashboard evidence into reversible tests with human ownership and guardrails.

WORKED CALCULATION

Click-Through Rate

CTR = affiliate-link clicks / eligible content impressions

REALISTIC INPUTS

4,200 / 120,000 = 3.5%

DECISION

Impressions must use the same content, audience and window as clicks.

© 2026 Tertiary Infotech Academy Pte Ltd

WORKED CALCULATION

Approved Conversion Rate

CVR = approved conversions / unique tracked clicks

REALISTIC INPUTS

168 / 4,200 = 4.0%

DECISION

Pending or reversed orders do not prove completed commercial value.

© 2026 Tertiary Infotech Academy Pte Ltd

WORKED CALCULATION

Average Order Value

AOV = approved revenue / approved orders

REALISTIC INPUTS

$23,520 / 168 = $140

DECISION

Segment by product and new/existing customer before applying one average to forecasts.

© 2026 Tertiary Infotech Academy Pte Ltd

WORKED CALCULATION

Commission Rate

Effective commission rate = payable commission / approved revenue

REALISTIC INPUTS

$2,688 / $23,520 = 11.43%

DECISION

Tier bonuses and exclusions can make the effective rate differ from the headline rate.

© 2026 Tertiary Infotech Academy Pte Ltd

WORKED CALCULATION

Affiliate ROI

ROI = (attributed gross profit - commission - programme cost) / programme cost

REALISTIC INPUTS

($9,408 - $2,688 - $2,000) / $2,000 = 236%

DECISION

Use gross profit, not revenue, and disclose attribution assumptions.

© 2026 Tertiary Infotech Academy Pte Ltd

WORKED CALCULATION

Variance Threshold

Variance % = (actual - plan) / plan

REALISTIC INPUTS

($23,520 - $20,000) / $20,000 = 17.6%

DECISION

Materiality is an approved threshold; an agent should not invent it after seeing results.

© 2026 Tertiary Infotech Academy Pte Ltd

COMPARE

First-Click vs Last-Click

First-click

- ✓ Credits discovery source
- ✓ Useful for acquisition analysis
- ✓ Ignores closing influence

Last-click

- ✓ Credits final touch
- ✓ Common and operationally simple
- ✓ Ignores earlier assistance

© 2026 Tertiary Infotech Academy Pte Ltd

COMPARE

Gross vs Approved Conversion

Gross

- ✓ Fast leading signal
- ✓ Includes pending and fraud
- ✓ Overstates payable value

Approved

- ✓ Validated merchant outcome
- ✓ Supports settlement
- ✓ Arrives with delay

© 2026 Tertiary Infotech Academy Pte Ltd

COMPARE

Platform Dashboard vs Reconciled Ledger

Platform

- ✓ Quick operational view
- ✓ Uses network definitions
- ✓ May omit merchant reversals

Reconciled

- ✓ Joins merchant truth
- ✓ Supports finance and payout
- ✓ Needs identity and timing controls

© 2026 Tertiary Infotech Academy Pte Ltd

COMPARE

Disclosure Present vs Disclosure Clear

Present

- ✓ Words exist somewhere
- ✓ May be hidden after click
- ✓ Can fail consumer understanding

Clear

- ✓ Prominent before endorsement
- ✓ Plain language
- ✓ Matches channel context

© 2026 Tertiary Infotech Academy Pte Ltd

COMPARE

Agent Narrative vs Deterministic Metric

Agent narrative

- ✓ Explains patterns and hypotheses
- ✓ Useful for stakeholder reading
- ✓ Can overstate causality

Deterministic metric

- ✓ Recomputable formula
- ✓ Explicit fields and denominator
- ✓ Source of record for decisions

© 2026 Tertiary Infotech Academy Pte Ltd

COMPARE

Optimisation vs Policy Override

Optimisation

- ✓ Changes creative, mix or cadence
- ✓ Bounded test and guardrails
- ✓ Owner can reverse

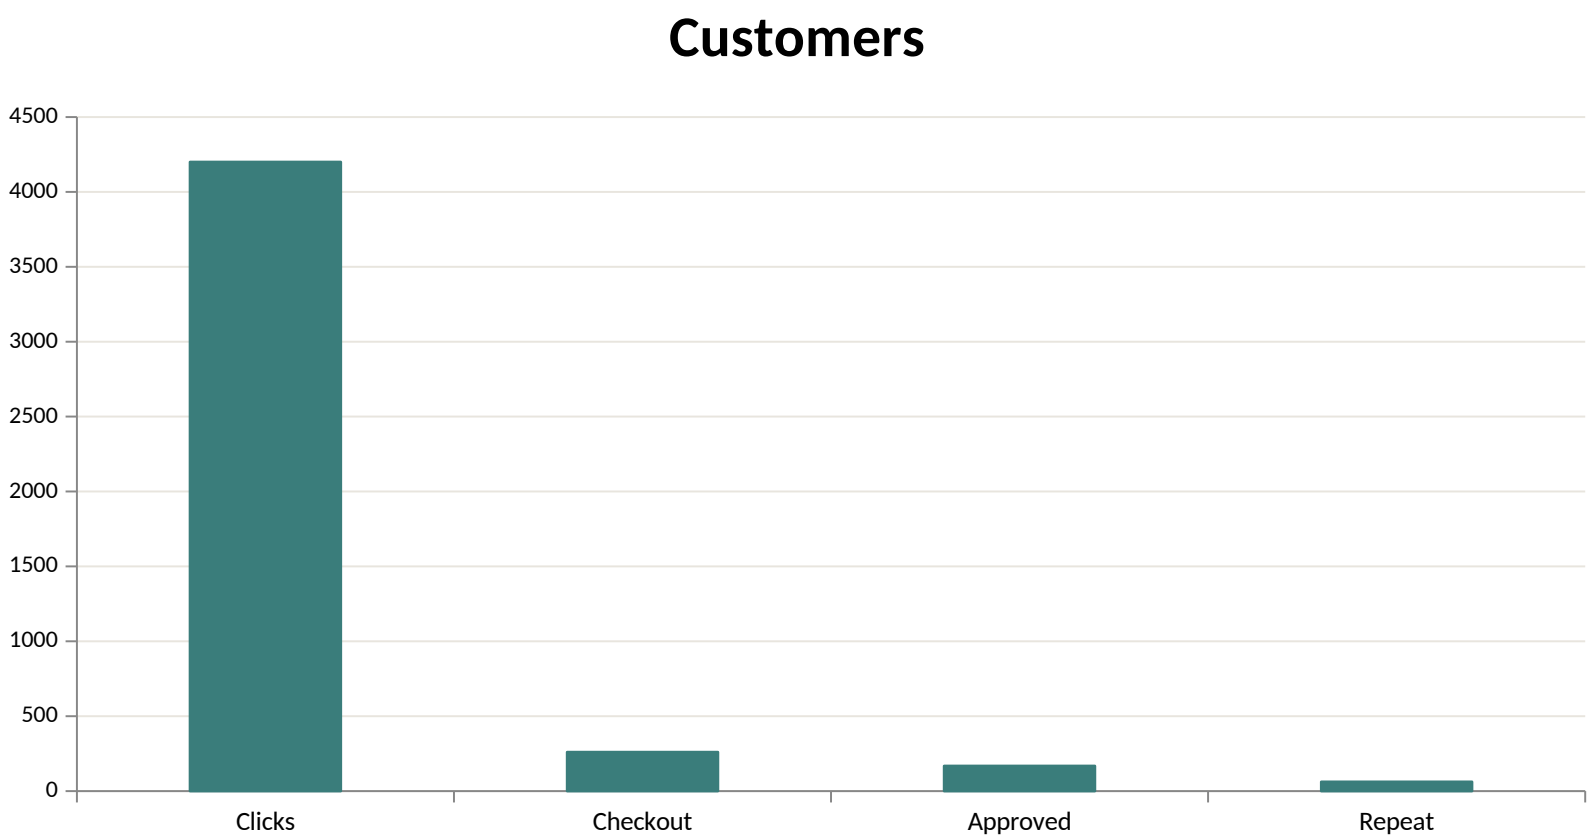

Policy override

- ✓ Weakens disclosure or controls
- ✓ Not a performance lever
- ✓ Requires governance decision, usually reject

© 2026 Tertiary Infotech Academy Pte Ltd

NATIVE PPT CHART

Affiliate Funnel

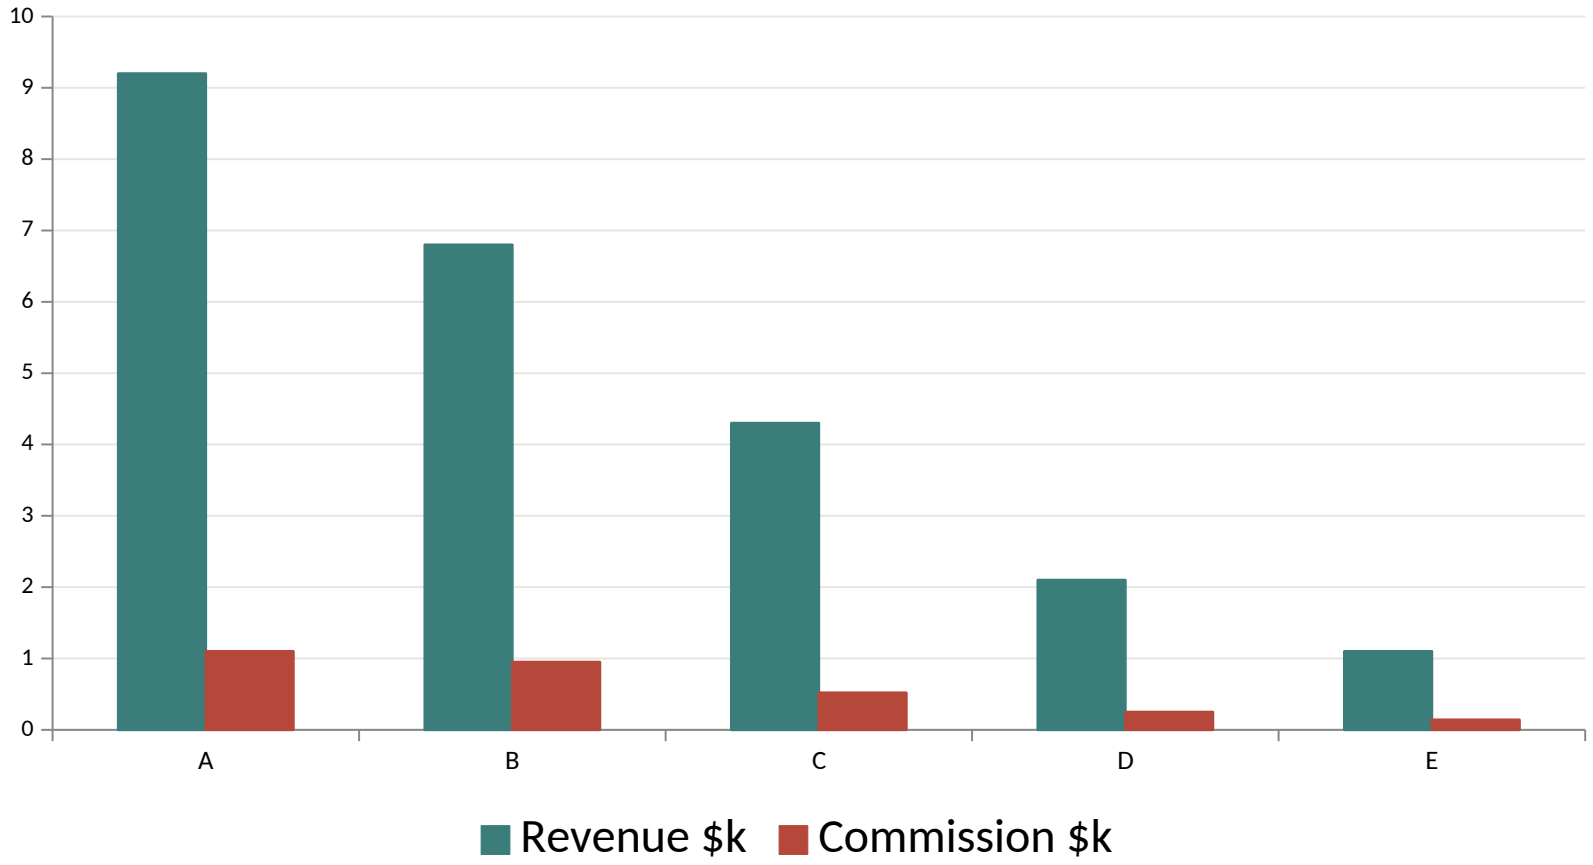

WHAT THE DATA SHOWS

Checkout-to-approved loss should be split into abandonment, fraud, cancellation and return causes.

© 2026 Tertiary Infotech Academy Pte Ltd

NATIVE PPT CHART

Revenue and Commission by Partner

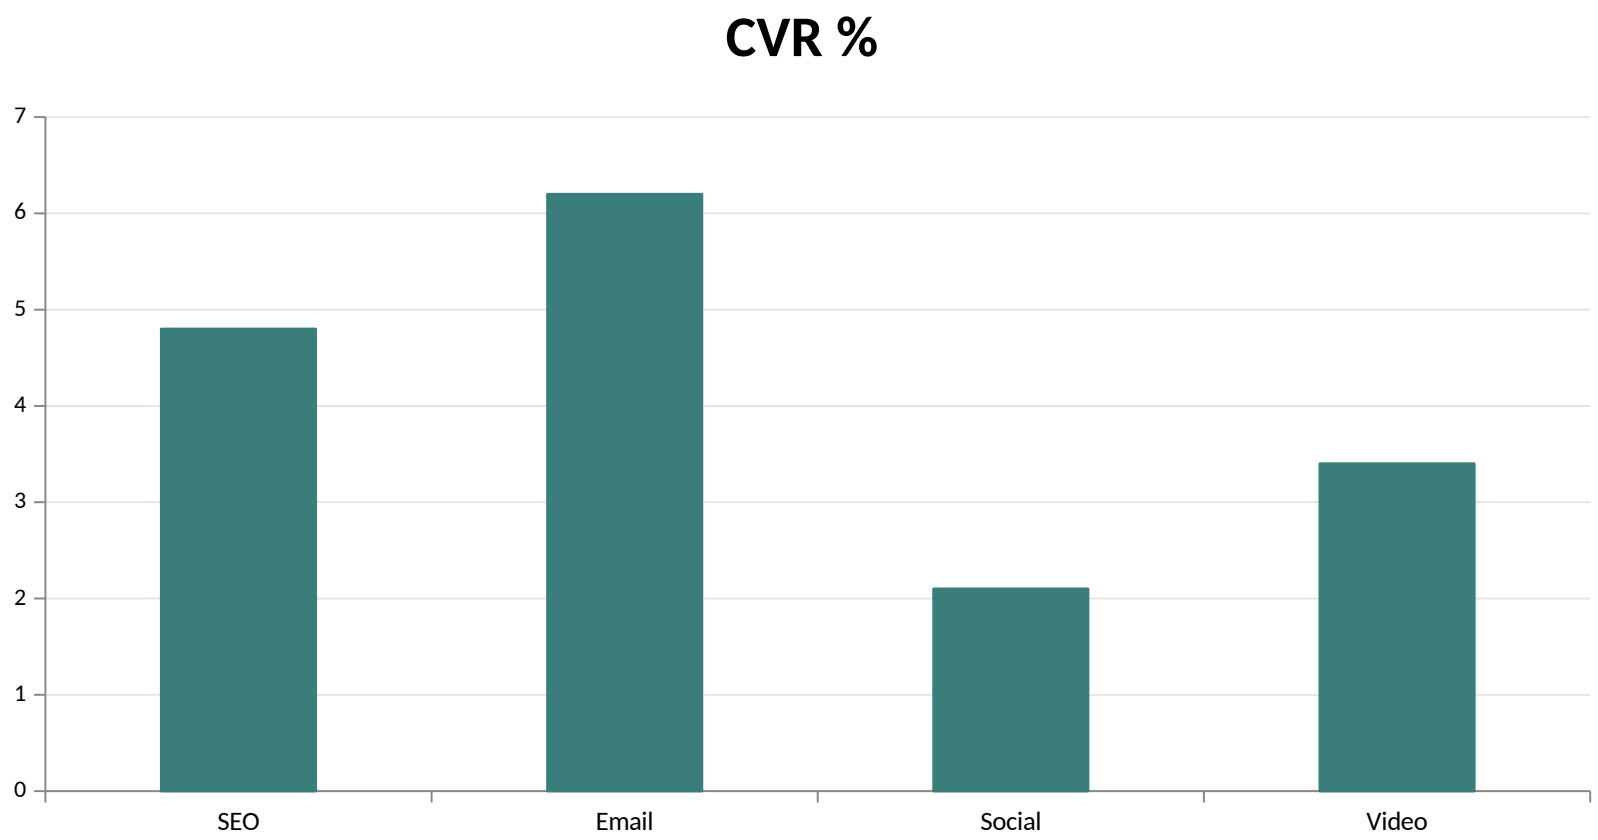

WHAT THE DATA SHOWS

Partner B has a higher effective commission burden than Partner A despite lower revenue.

© 2026 Tertiary Infotech Academy Pte Ltd

NATIVE PPT CHART

Conversion Rate by Channel

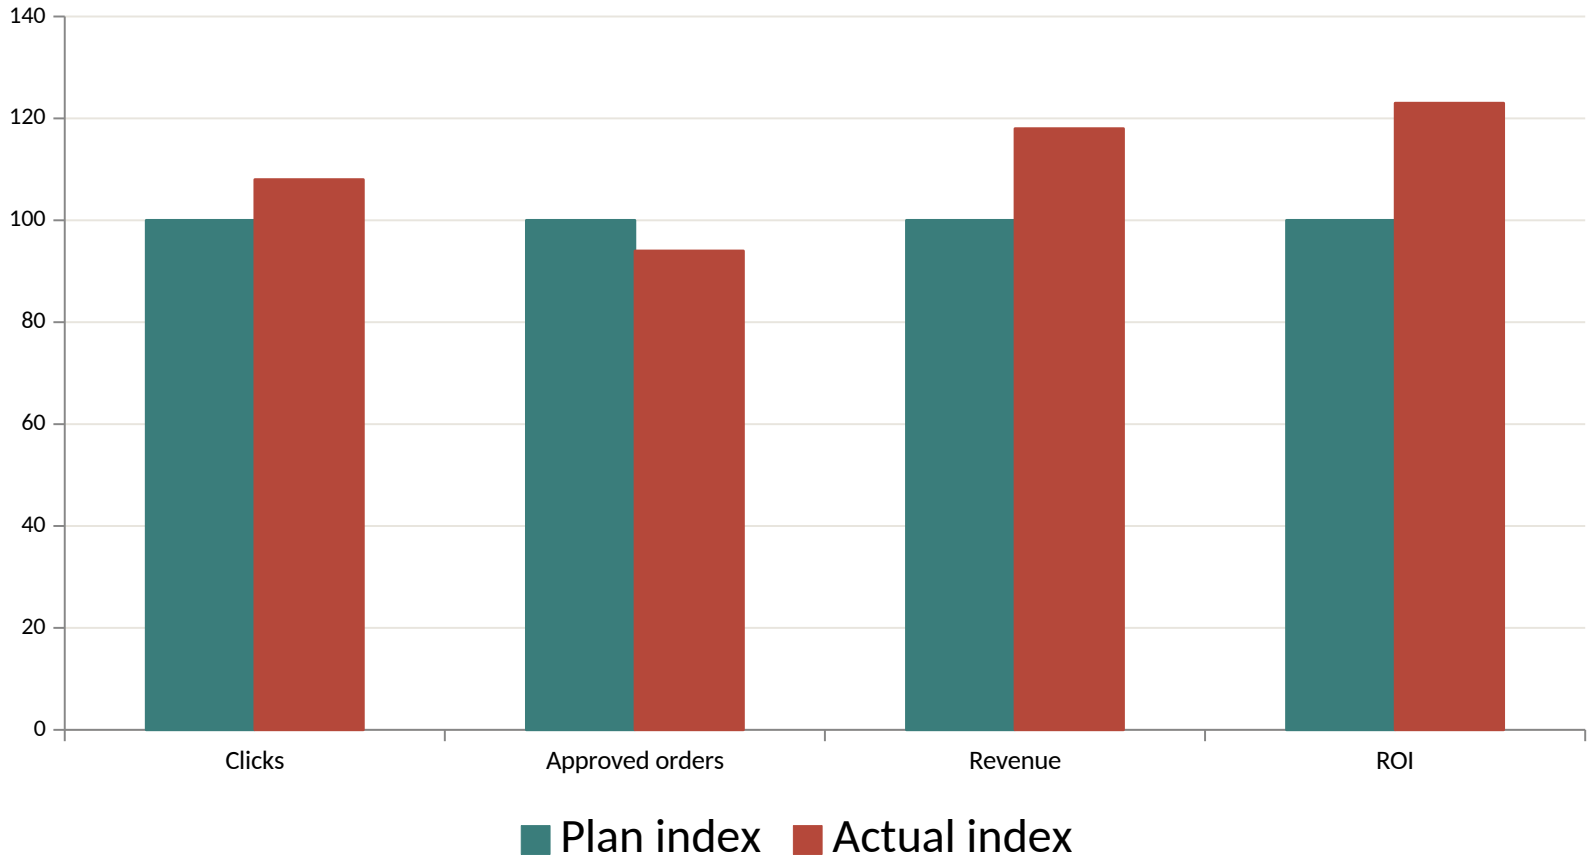

WHAT THE DATA SHOWS

Channel mix changes can move the blended conversion rate without any content-quality change.

© 2026 Tertiary Infotech Academy Pte Ltd

NATIVE PPT CHART

Performance Against Plan

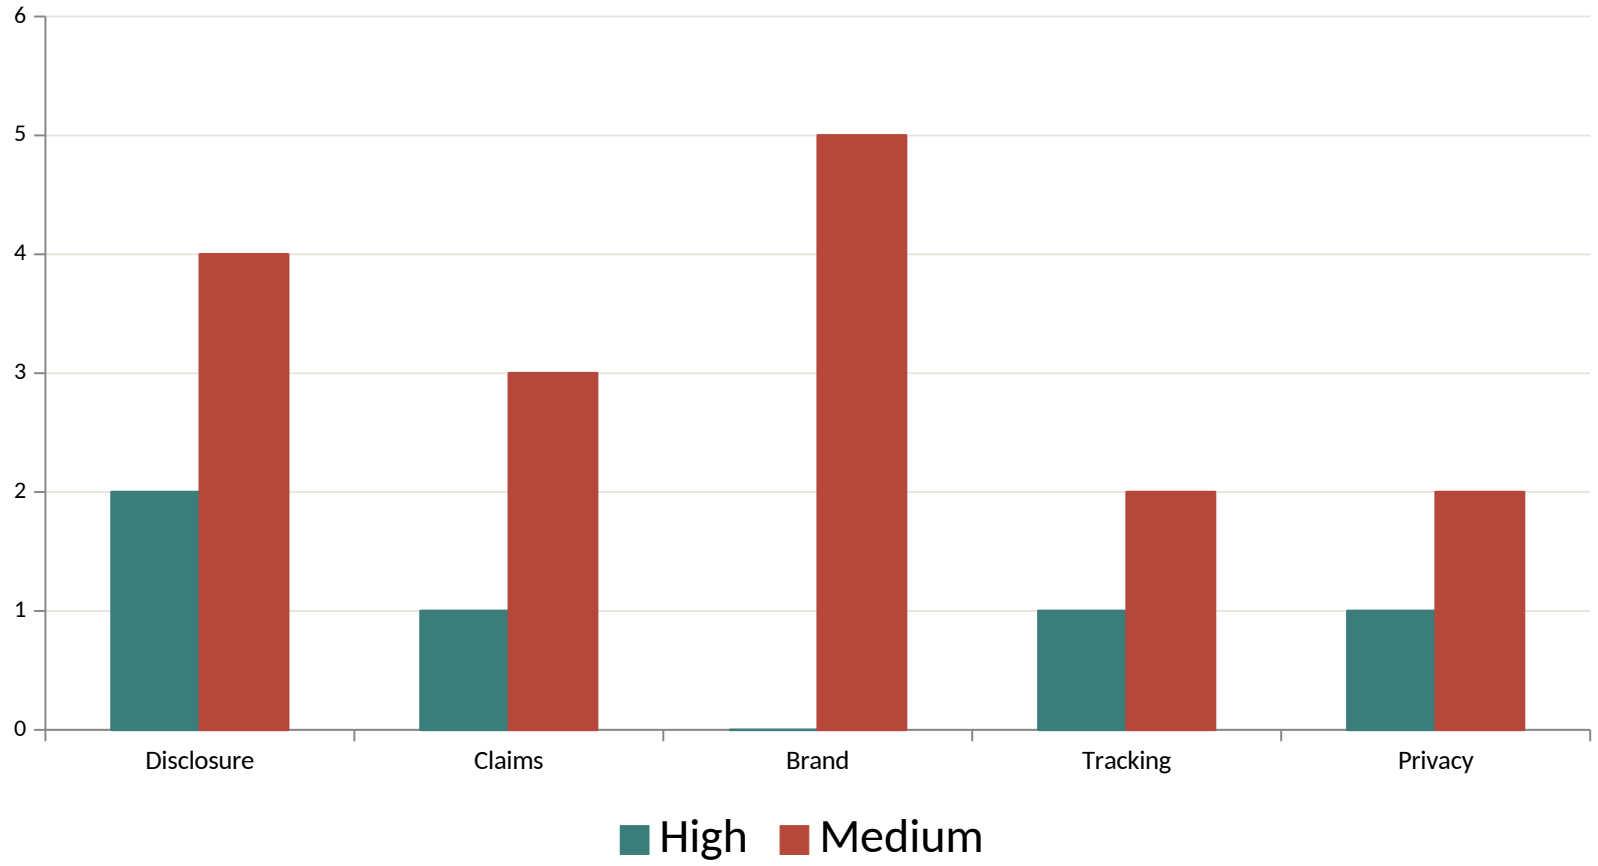

WHAT THE DATA SHOWS

More clicks produced fewer approved orders, but larger baskets lifted revenue and ROI.

© 2026 Tertiary Infotech Academy Pte Ltd

NATIVE PPT CHART

Compliance Findings by Severity

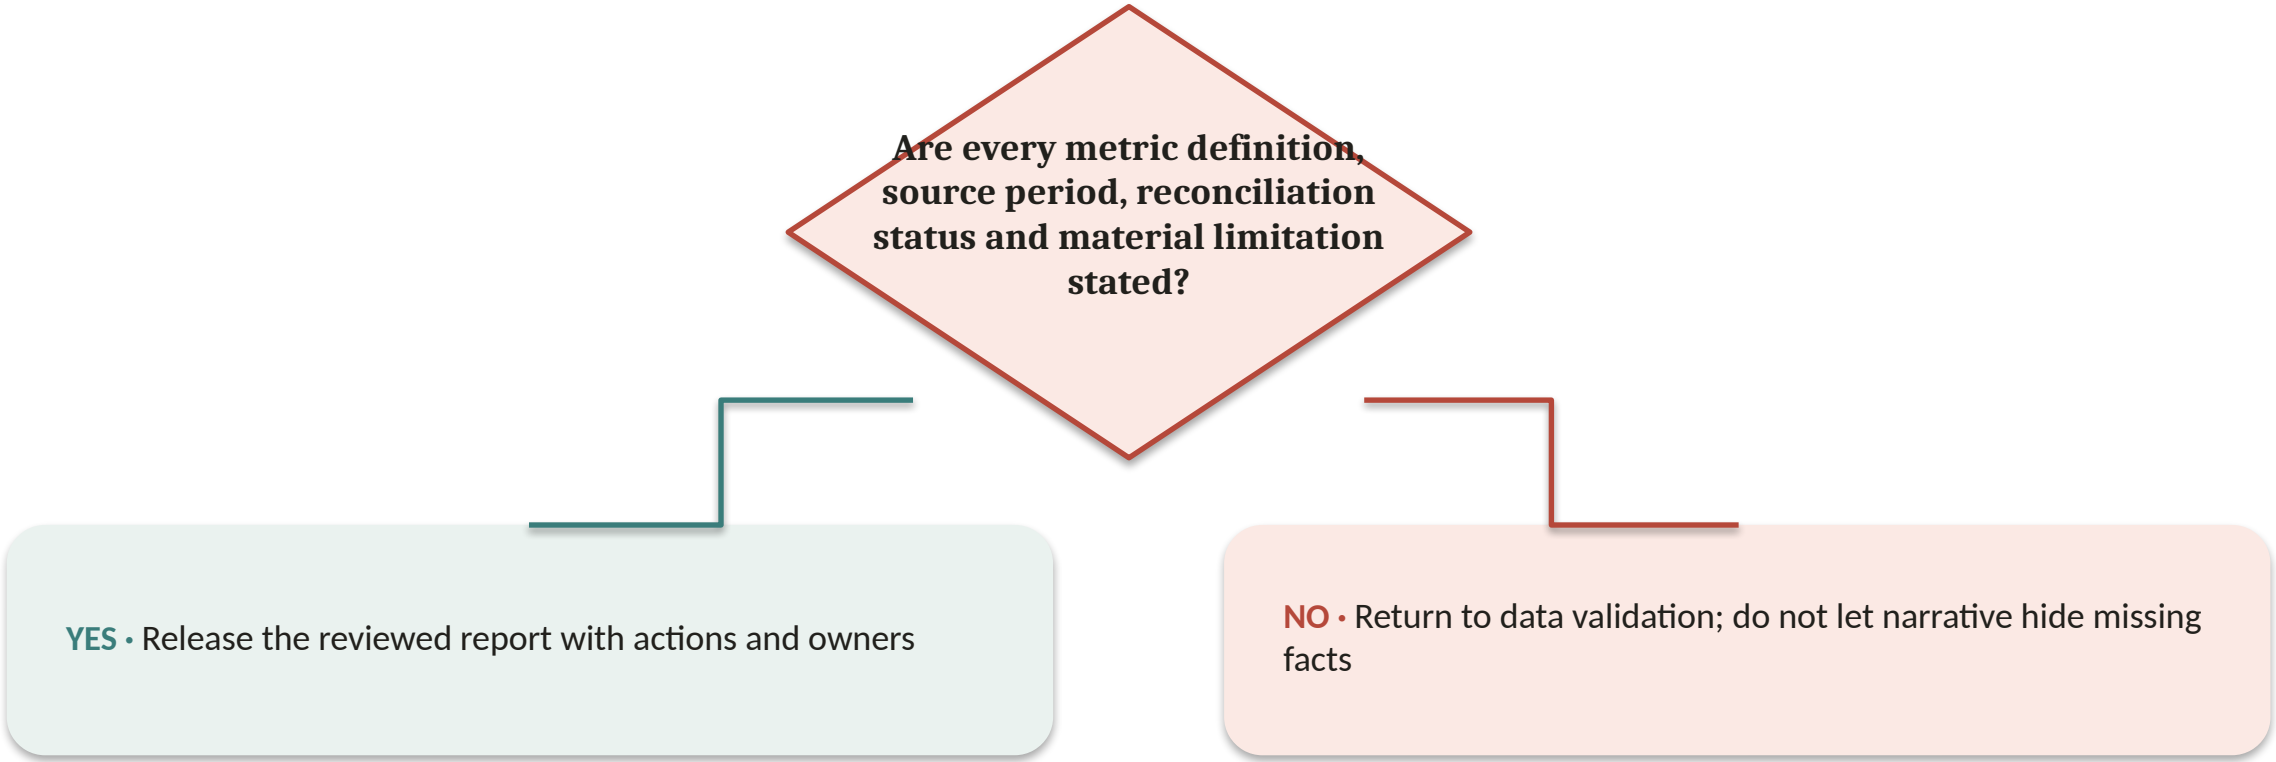

WHAT THE DATA SHOWS

Disclosure is the first remediation priority because it has the most high-severity findings.

© 2026 Tertiary Infotech Academy Pte Ltd

DECISION RULE

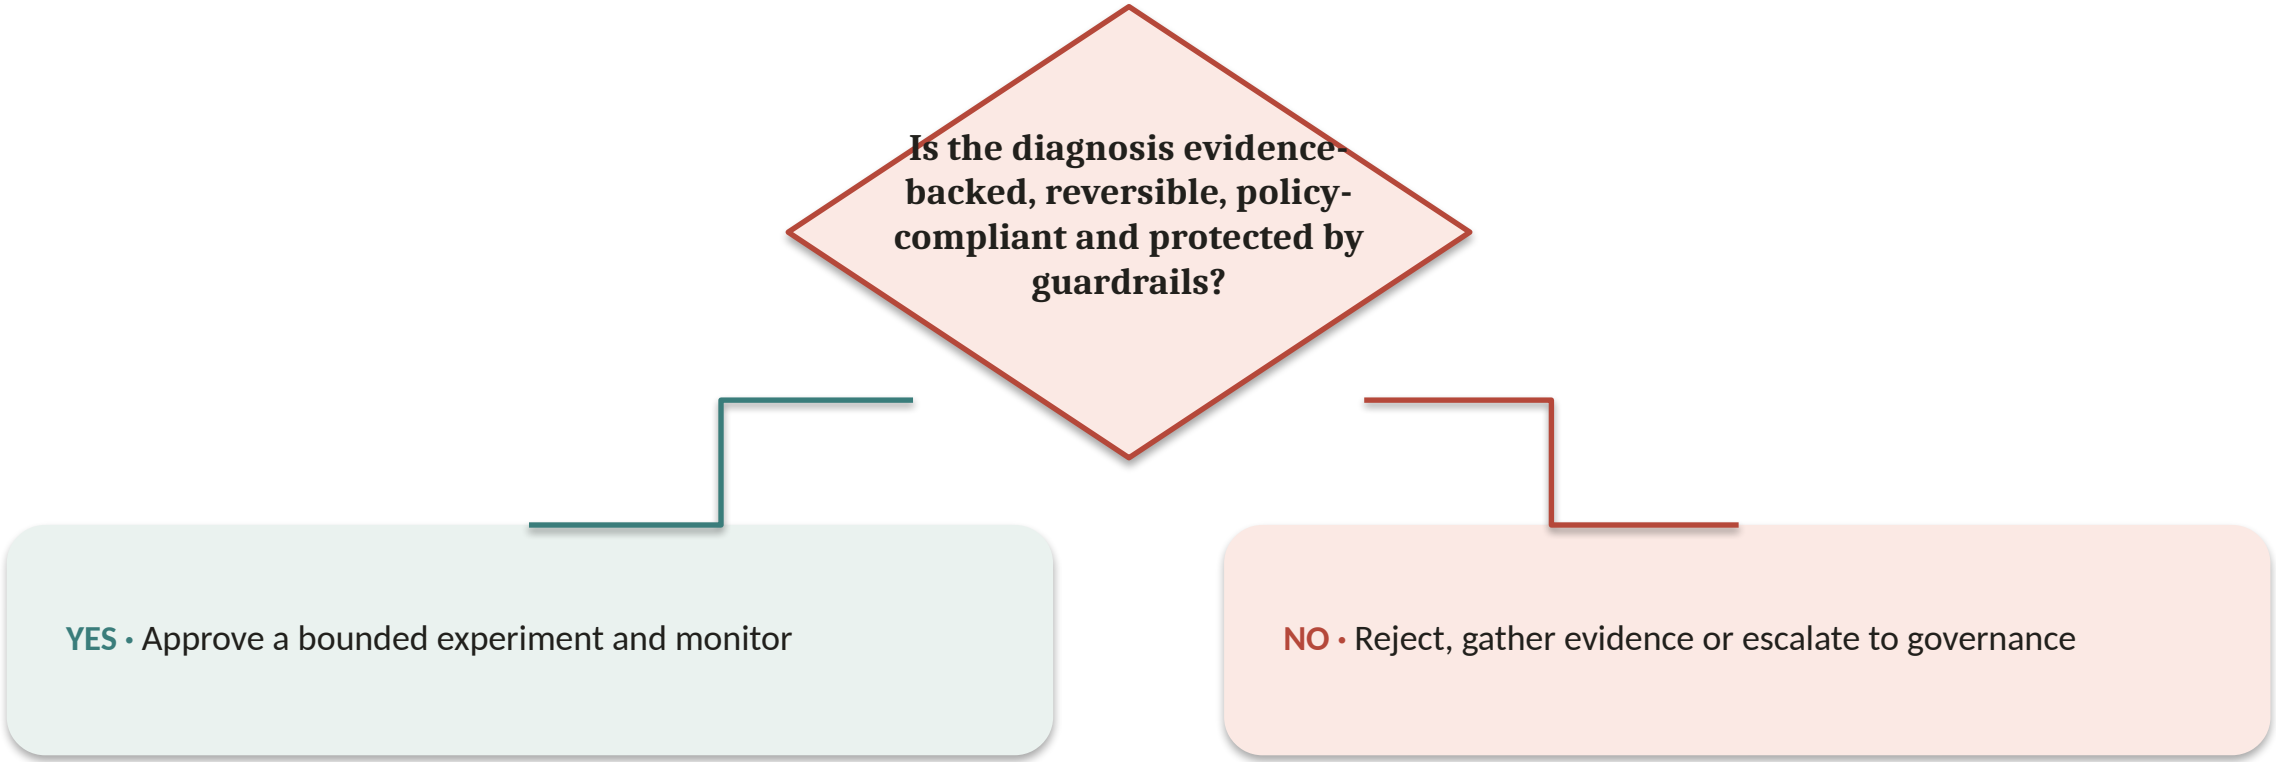

Publish a Campaign Report

© 2026 Tertiary Infotech Academy Pte Ltd

DECISION RULE

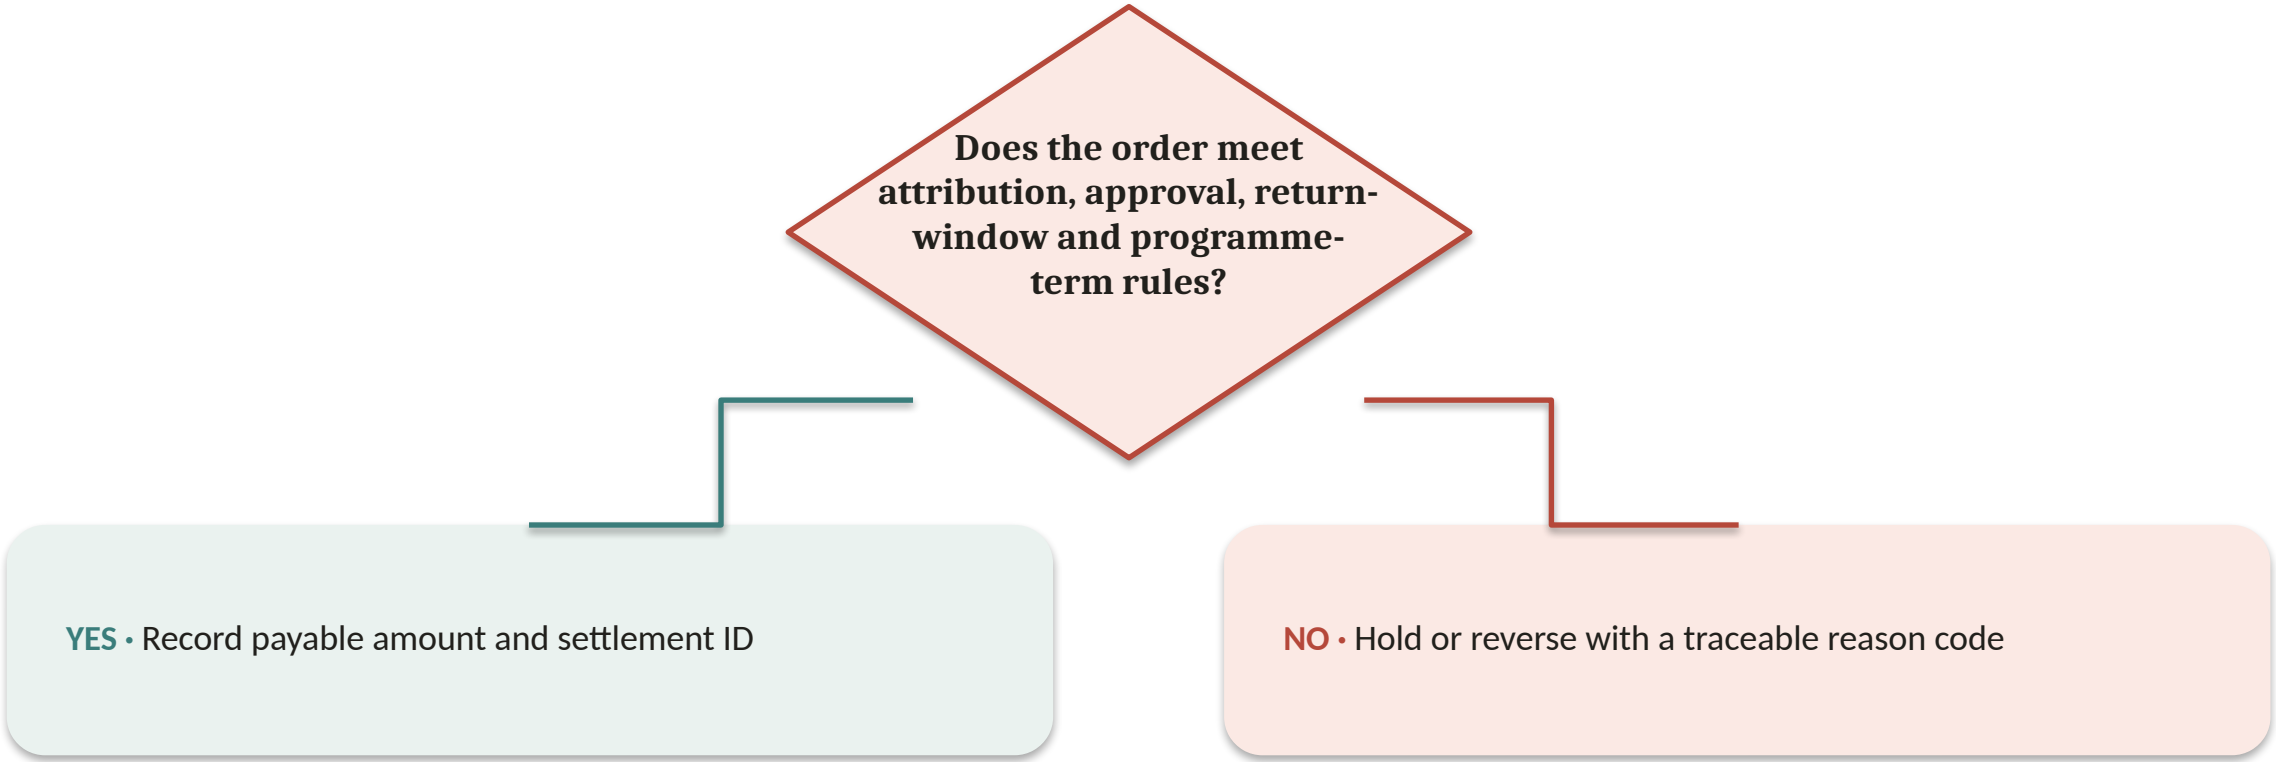

Approve an Optimisation

© 2026 Tertiary Infotech Academy Pte Ltd

DECISION RULE

Pay a Commission

© 2026 Tertiary Infotech Academy Pte Ltd

FAILURE CONTROL

Attribution Failure Modes

Duplicate click	retry counted twice
Broken join	order lacks click or partner key
Window mismatch	conversion outside terms
Cross-device gap	journey cannot be linked
Consent breach	tracking beyond lawful boundary

© 2026 Tertiary Infotech Academy Pte Ltd

FAILURE CONTROL

Reporting Failure Modes

Metric drift	same label, changed formula
Gross value	reversals omitted
Blended average	segment weakness hidden
Narrative inflation	correlation stated as cause
No owner	recommendation never closes

© 2026 Tertiary Infotech Academy Pte Ltd

Compliance Failure Modes

Hidden disclosure	affiliate relationship unclear
Unsupported claim	evidence absent or stale
Brand drift	partner changes mandatory message
Privacy misuse	personal data copied to tools
Agent release	content publishes without human approval
